20.	BREACH OF CONTRACT, REMEDIES AND TERMINATION:	The following shall amount to breach of contract:  I. Non-supply of material/ non-completion of work by the Supplier/Vendor within scheduled delivery/ completion period as per contract or as extended from time to time.  II. The Supplier/Vendor fails to perform as per the activity schedule and there are sufficient reasons even before expiry of the delivery/ completion period to justify that supplies shall be inordinately delayed beyond contractual delivery/ completion period to justify that supplies shall be inordinately delayed beyond contractual delivery/ completion period.  III. The Supplier/Vendor delivers equipment/ material not of the contracted quality.  IV. The Supplier/Vendor fails to replace the defective equipment/ material/ component as per guarantee clause.  V. Withdrawal from or abandonment of the work by the Supplier/Vendor before completion as per contract.  VI. Assignment, transfer, subletting of Contract by the Supplier/Vendor without BHEL's written permission resulting in termination of Contract or part thereof by BHEL.  VII. Non-compliance to any contractual condition or any other default attributable to Supplier/Vendor.  VIII. Any other reason(s) attributable to Vendor towards failure of performance of contract. In case of breach of contract, BHEL shall have the right to terminate the Purchase Order/  Contract either in whole or in part thereof without any compensation to the Supplier/Vendor.  IX. Any of the declarations furnished by the contractor at the time of bidding and/ or entering into the contract for supply are found untruthful and such declarations were of a nature that could have resulted in non-award of contract to the contractor or could expose BHEL and/ or Owner to adverse consequences, financial or otherwise.  X. Supplier/Vendor is convicted of any offence involving corrupt business practices, antinational activities or any such offence that compromises the business ethics of BHEL, in violation of the Integrity Pact entered into with BHEL has the potential to harm the overall	
		10% of the Contract Value for the damages on account of breach of contract committed by the Supplier/Vendor. This amount shall be recovered by way of encashing the security instruments like performance bank guarantee etc available with BHEL against the said contract. In case the value of the security instruments available is less than 10% of the contract value, the balance amount shall be recovered from other financial remedies (i.e. available bills of the Supplier/Vendor, retention amount, from the money due to the Supplier/Vendor etc. with BHEL) or the other legal remedies shall be pursued.  iii) wherever the value of security instruments like performance bank guarantee available with BHEL against the said contract is 10% of the contract value or more, such security instruments to the extent of 10% contract value will be encashed. In case no security instruments are available or the value of the security instruments available is less than 10% of the contract value, the 10% of the contract value or the balance amount, as the case may be, will be recovered in all or any of the following manners:  iv) In case the amount recovered under sub clause (a) above is not sufficient to fulfil the amount recoverable then; a demand notice to deposit the balance amount within 30 days shall be issued to Supplier/Vendor.	

v) If Supplier/Vendor fails to deposit the balance amount within the period as prescribed in

demand notice, following action shall be taken for recovery of the balance amount: a) from dues available in the form of Bills payable to defaulted Supplier/Vendor against the same contract. b) If it is not possible to recover the dues available from the same contract or dues are insufficient to meet the recoverable amount, balance amount shall be recovered from any money(s) payable to Supplier/Vendor under any contract with other Units of BHEL including recovery from security deposits or any other deposit available in the form of security instruments of any kind against Security deposit or EMD. vi) In-case recoveries are not possible with any of the above available options, Legal action shall be initiated for recovery against defaulted supplier/Vendor. vii) It is an agreed term of contract that this amount shall be a genuine pre-estimate of damages that BHEL would incur in completion of balance contractual obligation of the contract through any other agency and BHEL will not be required to furnish any other evidence to the Supplier/Vendor for the purpose of estimation of damages. viii) In addition to the above, imposition of liquidated damages, debarment, termination, descoping, short-closure, etc., shall be applied as per provisions of the contract. 1) The defaulting Supplier/Vendor shall not be eligible for participation in any of the future enquiries floated by BHEL to complete the balance work. The defaulting contractor shall mean (a) In case defaulted Supplier/Vendor is the Sole Proprietorship Firm, any Sole Proprietorship Firm owned by same Sole Proprietor. (b) In case defaulted Supplier/Vendor is The Partnership Firm, any firm comprising of same partners/ some of the same partners; or sole proprietorship firm owned by any partner(s) as a sole proprietor. The offers of the bidders who are under suspension as also the offers of the bidders, who **Business Dealings** engage the services of the banned firms / principal / agents, shall be rejected. The list of banned with Suppliers / firms is available on BHEL web site www.bhel.com. **Contractors:** If any bidder / supplier / contractor during pre-tendering / tendering / post tendering / award / execution / post-execution stage indulges in any act, including but not limited to, mal-practices, cheating, bribery, fraud or and other misconduct or formation of cartel so as to influence the bidding process or influence the price or tampers the tendering process or acts or omits in any manner which tantamount to an offence punishable under any provision of the Indian Penal Code, 1860( Bhartiya Nyaya Samhita 2023) or any other law in force in India, or does anything which is actionable under the Guidelines for Suspension of Business dealings, action may be taken against such bidder / supplier / contractor as per extant guidelines of the company available on www.bhel.com and / or under applicable legal provisions. Guidelines for suspension of business dealings is available in the webpage: http://www.bhel.com/vender\_registration/vender.php. **Settlement of Dispute** If any dispute or difference of any kind whatsoever shall arise between BHEL and the **CONCILIATION &** Supplier/Vendor, arising out of the contract for the performance of the work whether during ARBITRATION: the progress of contract termination, abandonment or breach of the contract, it shall in the first place referred to Designated Officer / IEM for amicable resolution by the parties. Designated Officer / IEM who within 60 days after being requested shall give written notice of his decision to the contractor. Save as hereinafter provided, such decision in respect of every matter so referred shall forthwith be given effect to by the Supplier/Vendor who shall proceed with the work with all due diligence, whether he or BHEL desires to resolve the dispute as hereinafter provided or not. If after the Designated Engineer has given written notice of this decision to the party and no intention to pursue the dispute has been communicated to him by the affected party within 30 days from the receipt of such notice, the said decision shall become final and binding on the parties. In the event the Supplier/Vendor being dissatisfied with any such decision or if amicable settlement cannot be reached then all such disputed issues shall be

resolved through conciliation in terms of the BHEL Conciliation Scheme 2018 as per 'CONCILIATION' Clause.

### **CONCILIATION:**

21.

22.

Suspension

Settlement

Dispute,

Any dispute, difference or controversy of whatever nature howsoever arising under or out of or in relation to this Agreement (including its interpretation) between the Parties, and so notified in writing by either Party to the other Party (the "Dispute") shall, in the first instance, be attempted to be resolved amicably in accordance with the conciliation procedure as per BHEL Conciliation Scheme 2018. The proceedings of Conciliation shall broadly be governed by Part-III of the Arbitration and Conciliation Act 1996 or any statutory modification thereof and as provided in - "Procedure for conduct of conciliation proceedings" (as available in www.bhel.com).

### ARBITRATION:

Except as provided elsewhere in this Contract, in case Parties are unable to reach amicable settlement (whether by Conciliation to be conducted as provided herein above or otherwise) in respect of any dispute or difference; arising out of the formation, breach, termination, validity or execution of the Contract; or, the respective rights and liabilities of the Parties; or, in relation to interpretation of any provision of the Contract; or. in any manner touching upon the Contract (hereinafter referred to as the 'Dispute'), then, either Party may, refer the disputes to Arbitral Institution and such dispute to be adjudicated by Sole Arbitrator appointed in accordance with the Rules of said Arbitral Institution.

A party willing to commence arbitration proceeding shall invoke Arbitration Clause by giving notice to the other party in terms of section 21 of the Arbitration & Conciliation Act, 1996 (hereinafter referred to as the 'Notice') before referring the matter to arbitral institution. The Notice shall be addressed to the Head of the Region, Power Sector/ Unit, BHEL, executing the Contract and shall contain the particulars of all claims to be referred to arbitration with sufficient detail and shall also indicate the monetary amount of such claim including interest, if any.

After expiry of 30 days from the date of receipt of aforesaid notice, the party invoking the Arbitration shall submit that dispute to the Arbitral Institutions (shall be identified by the contract issuing agency) and that dispute shall be adjudicated in accordance with their respective Arbitration Rules. The matter shall be adjudicated by a Sole Arbitrator who shall necessarily be a Retd Judge having considerable experience in commercial matters to be appointed/nominated by the respective institution. The cost/expenses pertaining to the said Arbitration shall also be governed in accordance with the Rules of the respective Arbitral Institution. The decision of the party invoking the Arbitration for reference of dispute to a specific Arbitral institution for adjudication of that dispute shall be final and binding on both the parties and shall not be subject to any change thereafter. The institution once selected at the time of invocation of dispute shall remain unchanged.

The fee and expenses shall be borne by the parties as per the Arbitral Institutional rules.

The Arbitration proceedings shall be in English language and the seat and venue of Arbitration shall be at the court(s) of Haridwar.

Subject to the above, the provisions of Arbitration & Conciliation Act 1996 and any amendment thereof shall be applicable. All matters relating to this Contract and arising out of invocation of Arbitration clause are subject to the exclusive jurisdiction of the Court(s) situated at Haridwar , shall have exclusive jurisdiction.

Notwithstanding any reference to the Designated Engineer or Conciliation or Arbitration herein, a. the parties shall continue to perform their respective obligations under the Contract unless they otherwise agree. Settlement of Dispute clause cannot be invoked by the Contractor, if the Contract has been mutually closed or 'No Demand Certificate' has been furnished by the Contractor or any Settlement Agreement has been signed between the Employer and the Contractor.

It is agreed that Mechanism of resolution of disputes through arbitration shall be available only in the cases where the value of the dispute is less than Rs. 10 Crores.

In case the disputed amount Claim, Counter claim including interest is Rs. 10 crores and above, the parties shall be within their rights to take recourse to remedies other than Arbitration, as may be available to them under the applicable laws after prior intimation to the other party. Subject to the aforesaid conditions, provisions of the Arbitration and Conciliation Act, 1996 and any statutory modifications or re-enactment thereof as amended from time to time, shall apply to the arbitration proceedings under this clause.

In case, multiple arbitrations are invoked (whether sub-judice or arbitral award passed) by any party to under this contract, then the cumulative value of claims (including interest claimed or awarded) in all such arbitrations shall be taken in account while arriving at the total claim in dispute for the subject contract for the purpose of clause mentioned above. Disputes having cumulative value of less than 10 crores shall be resolved through arbitration and any additional

		dispute shall be adjudic	ated by the court of con	anetent jurisdiction		
		uispute siiaii be adjudic	ated by the court of con	ipetent jurisuiction.

	Conditions for	documents submitted for the Pre-Qualification Criteria (PQR).	
	Assessment	BHEL also reserves the right to have on-site assessment of the facilities at supplier's works during the bid evaluation.	
34.	Quality Requirement	VENDOR TO CONFIRM FOR PROVIDING TESTING AND CERTIFICATION AS PER ORDER SPECIFICATION	

### **SPECIAL NOTE FOR BIDDERS:**

- a. In the event of our customer order covering this tender being cancelled /placed on hold /otherwise modified, BHEL would be constrained to accordingly cancel / hold / modify the tender at any stage of execution.
- b. BHEL may negotiate the L1 rate, if not meeting our budget / estimated cost. BHEL may re-float the tender opened, if L1 price is not acceptable to BHEL even after negotiation.
- c. Any change in applicable rates of Tax or any other statutory levies (Direct / Indirect) or any new introduction of any levy by means of statute and its corresponding liability for the deliveries beyond the agreed delivery date for reasons not attributable to BHEL will be to vendors account. BHEL will not reimburse the same and any subsequent claim in this respect will be summarily rejected.
- d. BHEL reserves its right to reject an offer due to unsatisfactory past performance by the respective Vendor in the execution of any contract to any BHEL project / Unit.
- e. The offers of the bidders who are under suspension and also the offers of the bidders, who engage the services of the banned firms /principal/agents, shall be rejected. The list of banned firms is available on BHEL web site www.bhel.com.
- f. Recovery / deduction as applicable as per Direct and Indirect taxes as notified by Govt. Of India from time to time will be made and information/certificate for such deduction/recoveries shall be provided by BHEL to the vendor.
- g. If the delivery of supply as detailed above gets delayed beyond the delivery period, the Supplier/Vendor shall request for a delivery extension and BHEL at its discretion may extend the Contract. However, if any 'Delivery extension' is granted to the Supplier/Vendor for completion of supply, due to backlog attributable to the Supplier/Vendor, then it shall be without prejudice to the rights of BHEL to impose LD for the delays attributable to the Supplier/Vendor.
- h. In case BHEL increase the quantity during currency of the contract in line with quantity variation clause of GeM bid, delivery extension on pro-rata basis shall be given for supply of these additional quantity.

Following documents are an integral part of this Tender Enquiry and endorsed copies of these documents (duly signed and stamped on each page, as a token of acceptance) are to be submitted/uploaded along with offer on GeM portal against this bid.

- 1. Please submit replica of Price schedule (without prices) showing "quoted" in place of price along with techno-commercial bid (Part-I).
- 2. Please submit signed & Stamped copy (each page) of duly filled of confirmation column of "Buyers Specific Additional Terms & Conditions (ATC)" and its clause wise supporting documents where required.
- **3.** Please submit signed & stamped copy (each page) for qualifying PQR with proper filled information and related supporting documents as mentioned in PQR.
- 4. Please submit certificate of Minimum local content as specified in the Make In India Certificate of the tender

# <u>PRE-QUALIFICATION REQUIREMENTS FOR SPARES OF LT SWITHGEAR ITEMS FOR OPU</u>

1. Vendor to submit experience-list<sup>\$</sup> (manufacturing/supplying/ testing/ support after sales) for supply of any of the 3 items listed in the Doc. No. 41810F51002 of enquiry for continuous operation as per details outlined below:-

\$ where experience list means fulfillment of below parameters: -

- a) Supply of at least 2 no. each of any of the 3 items listed in the Doc. No. 41810F51002 of enquiry in last 5 (Five) years from the date of Enquiry.
- b) Further details of experience-list to be furnished in the following tabular format: -

Sl No.	Project/Customer Name & Location	Purchase Order Reference No.	Date of referred Purchase Order	Details of items supplied	Contact Details of End-Customer (Name, Full Address, Phone, Email etc.)

- 2. Vendor to submit unpriced copy of Purchase Orders in support of clause 1 (a) above.
- 3. BHEL reserve the right to verify the information submitted by bidder. In case the information found to be false /incorrect, the offer shall be rejected. Bidder to confirm.

### 1 INTENT OF SPECIFICATION

This specification is intended to cover design, manufacturing, testing, delivery supervision of system & commissioning of turbine oil purification system and putting the system into satisfactory operation.

RESPONSIBILITY OF BIDDER: The bidder shall be responsible for providing all material, equipment and services, specified or otherwise which are required to complete the project and fulfill the intent of ensuring operability, maintainability and the reliability of the complete work covered under this specification. It is not the intent to specify completely here in, all aspects of design and construction of equipment. Nevertheless, the equipment shall conform in all respects to high standards of engineering, design & workmanship & shall be capable of performing in continuous commercial operation, in a manner acceptable to Purchaser/Owner. Bidder is requested to carefully examine and understand the specification & seek clarification, if required, to ensure that they have understood the specifications prior to submit the bid.

### 2 SCOPE OF SUPPLY

- 2.1 One oil purification system (OPS) shall comprise of:
  - a. One centrifuge along with its drive & accessories.
  - b. Indirect type oil heater and accessories
  - c. One dirty oil feed pump complete with its drive & accessories.
  - d. One clean oil discharge pump complete with its drive & accessories (if applicable).
  - e. Polishing filter with suitable bypass arrangement.
  - f. Adequately sized booster pump (if required).
  - g. One overflow sight fitting (loose supply).
  - h. The OPS shall be such that it can be used both as purifier as well as clarifier.
  - An arrangement to detect and raise alarm in case of liquid seal breakage.
  - j. All relevant valves, Y-type strainer, fittings and inter-connecting piping.
  - k. All flanged end valves and flanged terminal points of piping along with counter flanges, nuts, bolts and gaskets.

ST39013

Page | 4 of 40

I. All relevant controls, interlocks and instrumentation.

- m. Foundation plates, anchor bolts, sleeves, inserts etc. required for installation of the complete system on foundation.
- Necessary lugs and eye bolts of all equipments for lifting the complete system during erection and maintenance.
- A set of required special tools and tackles for erection & commissioning and operation & maintenance of the system.
- 2.2 Spare Parts: Spares for satisfactory commissioning of the OPS are to be supplied (apart from mandatory spares). Also, a list of recommended spare parts with price break-up for 3 year satisfactory operation of the system shall also be supplied by vendor. Purchase order on the same shall be placed later by BHEL as per customer's requirement. Validity shall be kept suitable to meet our customer's requirement.

### 3 GENERAL TECHNICAL REQUIREMENTS

- 3.1 The OPS shall operate on a bypass system and the capacity of the unit shall as per the Table-A of this specification. The oil in system conforms to Servoprime-46 / ISO VG 46 / Turbinol-47 / BHEL standard practice (refer Annexure -I). The system will be located inside the turbine hall in oil room near oil tank.
- 3.2 The OPS should be as compact as possible so that it may be installed in the minimum required space and easy to handle.
- 3.3 The OPS should be suitably designed to operate in tropical climatic conditions. Equipment shall be designed for ambient temperature of 55°C and relative humidity of 95%.
- 3.4 Base area/ foundation of purifier shall be designed to be as compact as possible without any vibration problem as per IS: 10816-2.Norms as per approved datasheet.
- 3.5 All valves and instruments should be readily accessible to facilitate maintenance and operation.
- 3.6 The OPS should be completely vapour tight to prevent fumes and vapours from entering.
- 3.7 The equipment shall be suitable for continuous operation round the clock.
- 3.8 On load automatic cleaning of bowl assembly is preferable.

Page | 5 of 40

3.9 The OPS shall be equipped with sight glasses both for the purified oil and the separated water from the collecting pan.

- 3.10 Each purifier system shall be furnished with a positive displacement feed pump & a similar type discharge pump, if needed. Each pump shall be of the helical, herringbone, Spur gear or screw type with a normal capacity of at least 10% greater than that of the purifier system when operating under the maximum suction lift against the pressure required to feed the centrifuge. Each pump shall be fitted with adequate relief bypass valve to prevent damage from excess pressure.
- 3.11 Although oil temperature at the inlet to heater during normal operation of Turbine Generator set shall be 65°C but system should be designed to operate with oil at 20°C during cold starting of TG-set. During such operation, even if guaranteed purification cannot be achieved, the system shall be accepted.
- 3.12 Arrangement of oil recirculation piping/piping connection should be provided with recirculation line connecting to clean oil line at oil purifier outlet (with applicable NRVs) such that there are only two interfaces of oil inlet & outlet connection to oil purifier.
- 3.13 For two or more centrifuges running in parallel, a common skid housing for both or multiple centrifuges shall be supplied with inlet & outlet manifold. Connection interface with BHEL shall be inlet & outlet only, not multiple connections.
- 3.14 Pressure at the outlet of oil purification system shall be 1.5 to 2.0 bar (gauge).
- 3.15 The inlet, outlet & overflow connections to overflow sight fitting shall be NB80 (ø88.9X3.96)/NB40 (ø48.3X3.96)/NB15 (ø21.3X2.6) respectively. Also, it is to be noted that overflow sight fitting is to be supplied loose and the same shall be fitted in BHEL's Main Oil Tank at site.
- 3.16 A common drive system for separator, dirty oil feed pump and clean oil discharge pump (if required) shall also be considered. Details of such drive should be clearly submitted by the vendor in his offer.
- 3.17 Different variants for combination of Flow capacity of Oil Purification System, Control Panel Type and Heater Rating are given below in <u>Table- A.</u>

### 4 CONTROL AND INSTRUMENTATION

- 4.1 Offer should include all necessary interlocks & instruments along with remote indication facility in the control panel (protection type). Purchaser will review same & necessary addition / subtraction in interlocks & instruments, considered essential for smooth operation of the unit, will be asked to include. Some of the important interlocks/controls, required, are given below.
  - (a) Separator shall be provided with interlocks to prevent the operation of the unit unless the feed pump & the discharge pump are operating.
  - (b) A system of annunciating the flooding of the separator due to loss of water seal shall be provided.
  - (c) All instruments i.e. pressure gauges, RTDs etc. should be reliable & of proven design. Purchaser has full right to ask them changed from one supply source to another according to operational experience. All instruments should be calibrated at minimum 5 points throughout the range and accuracy, hysteresis, repeatability etc. shall be within the specified limits i.e. ± 1%.
  - (d) Auxiliary electric supply available at site comprises of 415V, 3ø, 3 wires, 50 Hz (± 10% V,± 5% frequency,± 10% combined). If supplier requires any other supply for his devices, instruments and drives etc. he shall arrange \ to convert 415V, 3ø supply to the required value for further distribution. Isolating switches, over current protection, fuses, junction boxes with terminal strips etc. as required for sub-distribution shall be deemed to be in bidder's scope.

00 (e) Motor shall be flame proof as per IS: 2148 and make shall be of BHEL approved vendor make. SUPERSEDES INVENTORY N Motor shall be preferably of class 2 or better in efficiency rating. If motor of any other efficiency is required, the same will be intimated to vendor during enquiry. Technical requirement for motor is given in Annexure-III.

- (f) The temperature of the oil leaving the heater shall be automatically controlled by RTD in not less than 3 steps. RTD shall function to open the heater circuits when the desired temperature is exceeded & to close the heater circuits before the temperature drops below that necessary for proper purification of the oil. The heater circuits shall be interlocked with the pump motor circuits to shut off the heaters when the pumps are not being operated. Heater rating should be as given in Table-A. Heaters shall be designed to operate in minimum of three steps & shall be of indirect type.
- (g) In case of polishing filter, it shall be equipped with a differential pressure switch with adjustable contracts to indicate high pressure drop across the filter along with alarm & annunciation system.
- (h) Local instruments for pressure temp. & flow indication shall be provided in accordance with clause 8.0 of Annexure-I.
- The unit should be provided with suitable alarm & annunciation system for easy operation & identification of fault conditions. It should have spare outputs in the form of potential free contact to be hooked-up with central annunciation system in the room.
- All control switches, indicating lamps & sound alarm devices shall be mounted on the front face plate of a cubicle (panel) to be supplied with purification unit.
- (k) Remote operating facility for all electrically operated components should be provided on control
- (I) All motors, heaters included in the offer, should be supplied along with its starter which will be mounted in the same panel.
- (m) An arrangement to detect and raise alarm in case of liquid seal breakage shall be provided. It may be adequately sized anti-flood tank with necessary drain valves along with level gauge or any other equivalent arrangement as per standard practice of the vendor. Drain and vent connections for level switch specified in Annexure-III to ST39013 shall be NB15 (ø21.3X2.6).
- (n) Control switches & Indicating lamps shall be as per vendor's standard practice or owner approved vendor/ make (project dependent).

- (o) If a common control panel is provided by vendor for two or more oil purifiers running in parallel, then control panel should be designed in such a way that it allows control of both the separators on the same panel. Control panel & controls shall also be able to work a purifier satisfactorily while one purifier is in shutdown/ breakdown.
- (p) Local Panel (LCP)construction:

Type: Fabricated from cold rolled sheet steel

Frame thickness: 2.0 mm Enclosure thickness: 1.6 mm Gland plate thickness: 3.0 mm

- (q) ON/OFF control, indication, and alarm functions shall be provided on the LCP as well as on HMI system (DCS).
- (r) Adequately sized copper ground bus shall be provided for each panel.
- (s) Control voltage shall be 110 V AC/220 VAC. This will be informed at the time of detail Engineering.
- (t) Cables for Motors and heaters shall be adequately sized keeping sufficient margin. Sizes shall be subject to BHEL/Customer approval.
- (u) Cable glands suitable for incoming 415 V feeder cables shall be provided. Cable Sizes will be intimated later.
- (v) LCP shall have 20% spare terminals.
- (w) Polishing filter (if applicable), chock alarm shall be provided through DPS.
- (x) All instruments/ Devices shall have IP55 degree of protection.
- (y) For level switches and other instruments, plug and socket type connectors shall be provided. For level switch over range proof pressure shall be 150% of max design pressure.
- (z) For Pressure gauge, Temperature gauge and level gauge over range test pressure shall be 1.5 times the maximum design pressure at 38 C. Range selection should cover 125% of max of scale. For Rotameter, the housing shall be IP55 protection class.
- (aa) Reports of type tests shall be those conducted within last five years.

- (bb) The local control panel shall have main switch fuse unit, power contactors, control transformer, space heater, alarm lamps, terminals, switchgear, OLR for separator motors and heaters and other contactors.
- (cc) Interconnection diagram shall be provided along with offer.
- (dd) Anti vibration pads shall be provided. Control panel should also be designed in such a way that it is able to withstand the site vibrations.
- (ee) Instruments/ equipments used in parallel system of 2x4500LPH system shall be of same make & type for both the purifiers in a single project.

### 4.2 For DCS control panel, additional requirements

The purification system shall be operated from control room as well as local panel having the logic built in BHEL control system instead of relay based control system.

It shall also have Local/remote switch, separator start/stop selector Switch, heater on/off sel. Switch Test/Accept/Reset push buttons and 24 V DC interfacing relays with DCS.

### Control Philosophy

- (a) The purification system shall be operated from control room, as well as local control panel "DCS/Local" selector switch shall be provided on the LCP.
- (b) All field instruments shall be wired to a JB, which shall be in vendor scope. From JB these shall be wired to DCS by BHEL.
- (c) Operating sequence and interlocks for various drives shall be programmed in BHEL's DCS. Vendor shall furnish Logic diagram and write-up for operation of the system. All interlocks shall be clearly brought out in the logic diagram and write-up.
- (d) 24V Interfacing relay are to be supplied by vendor mounted in the LCP for operation of drives. 24V commands shall be given from DCS to these relays for operation of various drives.
- (e) Alarms shall be generated in DCS and output shall be given for driving the alarm windows in LCP.
- (f) Control of individual heaters stages shall be from DCS for maintaining required oil temp using 2 nos. duplex RTDs.

(g) Limit switch or any other alternate arrangement with BHEL approval shall be provided for separator cover for remote monitoring when operating in DCS.

- (h) Flow switch shall be provided at centrifuge inlet.
- (i) List of drives to be operated from DCS, list of instruments and list of alarms shall be furnished along with the offer.
- (j) Air requirement for 3-way valve shall be furnished with the offer.
- (k) Functional testing of system shall be done with local control panel and by simulating DCS outputs.

### 5 PERFORMANCE REQUIREMENTS

- a. The quality of purified oil at outlet of OPS at 65°C shall be as follows.
  - (i) Particle size of impurities at the outlet of OPS shall be equal to or better than class 15/12 as per ISO 4406 from class 21/18 at the inlet of the oil purification system in single pass without removing any additives/ inhibitors present in the oil and maintaining the lubricating value of the oil.
  - (ii) Moisture contents at the outlet of OPS shall be maximum 300 to 500 ppm from inlet of maximum 15000 ppm.
- b. Polishing filter shall be capable of handling the quantity of clean oil, coming out of the centrifuge & filtering it down to β3=1000 or better including colloidal carbon but shall not remove any rust inhibitor or oxidation inhibitor.
- c. Noise level shall not exceed 85 decibel measured at a distance of 1 meter from the equipment and at height of 1.5 meter from the ground level.
- d. Facility of indirect heater for heating oil from 50°C to the temperature which is required to make separation of water and oil most effective shall be provided. But to take care of situation while temperature is much below than 50°C, an arrangement of utilizing the heater to elevate the temperature of oil in the main oil tank to 50°C shall be provided. Heater shall be provided with suitable bypass arrangement.

### 6 GUARANTEES

6.1 The unit should be guaranteed for trouble free operation for a minimum period of 18 months after commissioning or 36 months after dispatch whichever is earlier.

Bare of grant

6.2 The purification level as indicated in clause 5.2 shall be guaranteed by the supplier.

- 6.3 The supplier shall guarantee the power consumption of the motor at normal duty point.
- 6.4 If during erection, commissioning and operation at site any deficiency in a part is detected with in guarantee period, BHEL site representative shall prepare the assessment report and a copy of the same shall be forwarded to the supplier. The supplier shall replace/ rectify the concerned items free of charge. The supplier if, he so desires may depute his representative at site at his own cost, otherwise the finding of BHEL/ Owner representative shall be final and binding on the supplier.
- 6.5 Care should be taken during packing of electrical/electronic items to insure that there is no damage to these items during handling/transportation.

### QUALITY ASSURANCE, INSPECTION AND TESTING

- 7.1 The manufacture shall conduct all tests required to ensure all the component parts of the oil purification unit offered conform to the requirements of the specification & in compliance with requirements of applicable codes & standards.
- 7.2 The bidder shall submit along with his offer quality plan in the prescribed BHEL's format as per Annexure-VI.
- 7.3 The particulars of the proposed shop tests & procedures for the tests shall be submitted to the BHEL/ owner for approval along with quality plan.
- 7.4 The equipments shall be dispatched only after inspection & clearance of material by BHEL/ Owner & approval of tests certificates by BHEL /Owner.
- 7.5 The minimum tests / checks to be carried out on the unit as envisaged by purchaser are given below. This is however, not intended to form a comprehensive testing programme as it is supplier's responsibility to prepare the detailed quality plan, which should also include tests checks carried out by supplier as a part of their normal practice. This quality plan is subjected to the approval of BHEL & owner. BHEL/ Owner reserves the right to ask any more checks at the time of quality plan finalization.
  - (1) TESTING OF MATERIALS: The material of each component that is bowl, bowl cover, disc, heater tubes, pump casing Shafts, gear/screw, valve body etc. shall be tested as per relevant specification for its composition & mechanical properties, viz. YS, UTS, impact strength, % elongation, % RA etc. suitable NDT on the above components to ensure freedom from surface & subsurface defects shall be carried out.
  - (2) Following tests shall be carried out during various stages of manufacture at manufacture's works.

(HEEP: HARIDWAR)

- (a) Check for dimensions of all the component parts including surface finish, radial run out of shaft
- (b) NDT:- Bowls shall be subjected to DP after final machining to ensure freedom from surface defects. Shaft shall be subjected to UT & DP to ensure freedom from internal & surface defects. All butt welds on oil piping shall be subjected to 10% RT & fillet welds to 100% MP/DP. Norms for acceptance to be informed in the offer for BHEL approval.
- (c) Static & dynamic balancing test on all rotating elements of the centrifuge. Acceptance Norms for vibration is 5.6 mm/s.
- (d) Hydraulic testing of all pressure parts including polishing filter if offered and vessel body etc. for 1.5 times of working pressure for 30 minutes & seat leakage test of valves at 1.0 times of working pressure for 30 minutes. No leakage to be ensured.
- (e) Performance test on feed & discharge oil pump, purifier motor, heaters, control system & other accessories. Reference & Acceptance norms for vibration to be informed in the offer for BHEL approval.
- (f) Type-test reports detailing the results for motors of similar ratings shall be furnished as called annexure III.
- (g) Routine test reports of motors to be furnished as per annexure III.
- (h) Control panel RTD, level switch & solenoid valve shall be subjected to the following final testing as applicable as routine test (unless otherwise stated) in addition to the stage inspection carried out by the vendor.
- (i) Dimensional checks as per approved drawing including proper cut outs, mounting of all instruments/ accessories etc. as per approved general arrangement drawing.
- (j) Functional/ operational checks of all wiring schematics, operational/ sequential interlocks etc. are applicable as per approved drawing.
  - i) Degree of protection test as per IS: 2147 (Type test) at 2.0 KV.
- (k) High voltage test & IR measurement not less than 30 mega ohm (MΩ) before and after test.
  - Pick up and drop down test & performance with ±10% voltage variation.
- (I) Capacity test of complete oil purification system. During capacity test, the complete purifier shall be tested at manufacture's works for mechanical running, vibration & noise level, sequential operation & interlocks, test for vapour tightness (if applicable), maximum particle size & moisture

content at the outlet of oil purification system. Acceptance norms for vibration to be informed in the offer for BHEL approval

(m) Verification/ BHEL approved type-test report for max. particle size & moisture content.

- 7.6 Party to furnish certificate of compliance for the instruments which are being installed in the system after P.O. placement.
- 7.7 STORAGE:- Bidder shall inform to purchaser along with the offer regarding storage facility which they require at the site for their equipment if the unit is to be stored at site for their equipment. If the unit is to be stored at site for next 12 to 18 months after dispatch from manufacturer's works.

### DOCUMENTS, DATA AND DRAWINGS TO BE FURNISHED BY SUPPLIER

### 8.1 DRAWINGS/ DOCUMENTS REQUIRED WITH THE OFFER

- a. GA drawing of the equipment offered, arrangement and layout drawing showing various equipments with all fittings, accessories and connection as well as clearance necessary for other equipment or structural members for operation and maintenance, loading data and foundation details of oil purification system.
- b. Data sheets of all instruments including RTDs, motor, solenoid valves, instruments and 3-way pneumatic/solenoid valve for oil purification system shall be furnished as per Annexure-II of this specification for BHEL's review.
- c. P&ID including bill of material indicating piping, valves, all instruments and devices of the system as per BHEL format annexure-VII.
- d. Drawings / Documents of all equipments such as heater, y-strainer, dirty & clean oil pump etc. shall also be included in the offer.
- e. Detailed technical literature on various equipments/ instruments and GA drawing of control panel.
- f. Characteristic curves of all pumps.
- g. Manufacturer's descriptive and illustrative literature showing details of equipments and method of operation of the complete system.
- h. Electrical single line diagram, control wiring diagram, interlocks schematic, protection scheme, details of motor and starter etc.

- Cross-sectional drawings of all equipments including horizontal and vertical section of separator indicating the recommended and mandatory spare parts. Also, list of recommended and mandatory spares with their part no. / model no. and quantity required.
- j. Details of standards /codes used for designing of the various equipments and selecting the material of various components.
- k. Name of the manufacturer and illustrative literature all components which have been outsourced for purchaser's review.
- All other relevant data and drawings which supplier considers necessary for better understanding of the system.
- m. Type test Reports for capacity, moisture content, particle size of impurities and motor efficiency conducted within last 5 years.
- n. Interconnecting diagram of DCS control panel (if required).
- Acceptance norms for (i) in process NDT of bowl, shaft, butt welds of piping. (ii) Static & dynamic balancing of shaft. (iii) Performance test on pumps & motors. (iv)Vibration norms for pumps, motor and unit.
- p. Also, Bidder to shall furnish the filled up check list of BHEL format as per annexure -VII.

### 8.2 DRAWINGS / DOCUMENTS REQUIRED WITHIN 30 DAYS AFTER PLACEMENT OF ORDER

- a. Five sets (paper based) of each of GA drawing, P&ID, filled in data sheet, control panel schematic & write-up etc. shall be furnished for review/ approval by BHEL/CUSTOMER after placement of order.
- Motor datasheet, curves/ graphs, type- test reports, efficiency rating etc. for review/ approval by BHEL/CUSTOMER after placement of order.
- c. O & M manual (soft/paper based) shall be furnished for BHEL review/approval.

### 8.3 DRAWINGS/ DOCUMENTS REQUIRED ALONGWITH SUPPLY

- a. All relevant test certificates & full details of the tests carried out as per the requirement of this specification before dispatch.
- b. Twenty sets (paper based) and 2 set (in CDROM) of O&M manual shall be furnished containing all drawings and datasheets, catalogues of all instruments and instructions for storage, erection &

Rate of grants

commissioning, operation and maintenance after approval. Vendor shall keep 2 copies of O&M manual in the dispatch box & shall also mention the same in its shipping list.

- c. Before bidder finalises these manuals, the same will be reviewed by purchaser. After getting approval of purchaser, final manual in required quality shall be dispatched. Manual shall clearly indicate all inspections & tests to be carried out at site and if any check list/ log sheets etc. are required to carry-out specified inspection & test that shall be made part of manual.
- d. Data sheets of all instruments, thermostats and motor .The same shall be included in O&M manual of oil purification system along with the catalogues of all instruments.

### MATERIALS OF CONSTRUCTION

- 9.1 The material of all rotating parts / components i.e. "bowl, bowl cover, disc, Shaft/spindle, gear/screw shall be of high grade stainless steel (e.g. austenitic) considering the purpose and the extent of contact with oil. Other parts coming in direct contact with water shall be of stainless steel or other corrosion resistant material conforming to applicable standard (IS / BS) or equivalent standard. All those parts that are coming in contact with oil & are not of Stainless steel / other corrosion resistant shall be mentioned in their offer. This should be submitted as a separate document indicating material/ make of all parts.
- 9.2 All piping, fittings & valves should be suitably selected as per applicable IS, BS or equivalent standard.
- 9.3 Strainers, wherever provided, should be designed to enable them to be cleaned during operation.
- 9.4 All other parts/ components shall be of compatible material to suit the applications.

### 10 CODES AND STANDARDS

In addition to the codes and standards specifically mentioned in the relevant technical specification for the equipment/ plant/ system, all equipment parts, systems and works covered under this specification shall comply with all currently applicable statutory regulations and safety codes (National/International).

### 11 CLEANING, PROTECTION AND PAINTING

Painting scheme shall be according to BHEL approved/ previously approved scheme. Painting scheme for oil purification system shall be as below.

Paint (Coat)	Paint Type	No. of coat	DFT*
Primer Paint:	Epoxy base Zinc rich primer paint	2	70
Intermediate Paint:	Epoxy TiO2 Pigmented Polyamide Cured Paint	1	70
Finish (Final) Paint:	Aliphatic Acrylic 2 Pack Polyurethane Finish paint	2	60

Total Minimum DFT= 180

\*DFT- Dry Film Thickness (Final) in micron.

Paint Shade shall be as below:-

- For Oil purifier-Light Blue (RAL 5012)
- For Control Panel generally it is External-Light Grey (shade 631 of IS-5), Internal- Brillian White or paint shade will be informed during later stage of engineering.
- 11.1 All surfaces shall be thoroughly cleaned of all mill scales, oxides and other coating and prepared in the shops. The protective coating should be such as to prevent the deterioration of coating itself by him for internal and external surface protection which shall be checked and approved by BHEL / Owner. All surfaces which will not be easily accessible after the shop assembly, shall before hand be treated and protected for life of the equipment.
- 11.2 The pre-treatment/ painting of the control panel shall be done by 7 tank process/ shot blasting/ sand blasting, by 2 coats of primer and 2 coats of paint of shade no. 692 as per IS: 6005. The total thickness of paint shall be a minimum of 180 micron and maximum of 250 micron.
- 11.3 After testing of unit, its internals shall be thoroughly cleaned, dried and conserved before packing. Conservation shall be suitable for storing in saline atmosphere & for a period of 2 years before use. Unit shall be suitably packed for transportation. Supplier shall be responsible for all loss or damage during transportation, handling and storage due to improper packing.
- 11.4 Painting treatment for LCP shall be as per IS: 6005. Two coats of lead oxide primer followed by powder painting. External shade for front and Rear shall be RAL9002 and for panel sides shall be RAL5012. Internal color shall be same as external color indicated above.

### 12 DESIGN CO-ORDINATION MEETING

Supplier shall attend the meeting on his own cost, whenever felt necessary, called by purchaser / owner to clarify the subject matter to them during engineering, erection, commissioning, and any stage prior to handing over.

### 16 ANNEXURE-III (SPECIFICATION OF MOTOR)

1.0 A suitable motor conforming to the purification unit requirement shall be supplied. The motor shall also meet the following requirement broadly. The motor shall confirm to IS: 4722, IS: 325, IS: 2253, IS: 2254, IS: 4029, IS: 3202, IS12615:2011 & IS: 2148 or equipment BS: Specification. The motor shall meet all Indian statutory requirements.

1.1	Application	To drive feed pump (suction & discharge) and centrifuge		
1.2	Type of Motor	Squirrel cage, induction motor		
1.3	RW Rating at 500 ambient temp  It shall have at least 10-15% reserve capar required for drive the unit when it is dis max. quantity at max. viscosity			
1.4	KW actually required by driven equipment under specified operation/ start-up conditions.	Unit capacity		
1.5	Min. Voltage required under starting conditions to bring driven equipment up to rated speed.	80% rated		
1.6	Full load speed	It shall be commensurate with pump & centrifuge speed as per design		
1.7	Full load current	As per design		
1.8	Starting current	Not to exceed 600% of the rated exclusive of IS tolerance		
1.9	Starting Torque	1.3 (Min) of rated torque		
1.10	Break down torque	2.05 times (min) of rated valve.		
1.11	Efficiency at full load	IE2 AS PER IS 12615:2011		
1.12	Power factor at full load	0.85 (Min)		

1.13 Motor shall be designed to with stand the voltage and torque stresses developed due to between the motor residual voltage and incoming supply voltage equal to 150% of the rated motor voltage during fast changeover of buses.

#### 2.0 STARTING DATA

2.1	Starting	Suitable for DOL
2.2	Acceleration time with full load connected.	To be furnished by supplier.
2.3	Permissible starting duty cycle, No. of Starts.	3-Starts equally spread over an hour. 2-consecutive starts from hot condition without any injurious heating to the winding.

2.4	Overload (% of full load) that	Motor shall be capable for running at full load with 80% of	
	can be Carried by motor	rated voltage for 5 minutes and 70% of rated voltage for1	
	without impairing Overall	Sec. Locked rotor with stand time under hot condition at rated	
	performance and period for	voltage shall be at Least 2.5 sec more than starting time	
	Which this overload is applicable.		
2.5	Location	Turbine oil room indoor	
2.6	Class of Insulation	Class-F, fungus resistant as per IS:3202 with temp rise limited to that of class B.	
2.7	Shaft disposition mountings	As per Unit's supplier requirement.	
2.8	Method of connections driven equipment		
2.9	Direction of rotation and corresponding terminal designation	To suit pumps & centrifuge	
2.10	Enclosure and ventilation	Totally enclosed fan cooled and flame proof IP55.	
2.11	Bearing	As per supplier's design, min life 30,000 hrs	
2.12	Grounding Device	Suitable arrangement shall be provided for earthing the motor at two separate and distinct connection points. Design of earthing conductor shall be as per IS: 4722-1992.	
2.13	Terminal box	Flame proof terminal box to be provided with double compression Cable gland for Al cable Fault level: 45 KA for 0.01 Sec	

#### 3.0 SPECIAL REQUIREMENTS:

- 3.1 The motor shall be rewound able
- 3.2 The motor shall have on line greasing facility.
- 3.3 Motor shall be suitable for working in an environment of oil fumes without any hazard.
- 3.4 Separate terminal box for space heater (if applicable) to be provided.
- 3.5 Motor bearings (DE & NDE) shall be sealed type to avoid frequent Re-greasing.
- 3.6 The motor construction shall be suitable for easy disassembly and reassembly.
- 3.7 The terminal box shall be suitable for top and bottom entry of cable and shall be suitable for PVC insulated PVC sheathed armoured aluminium cables and shall be capable of being rotated by  $180^{\circ}$  in steps of  $90^{\circ}$ .
- 3.8 Motor vibrations shall be acceptable as per IS: 12075; motor efficiency as per IS 12615:2011& noise level as per IS: 12065. Also mechanical vibrations shall be under limits as per IS: 10816-2.
- 4.0 DOCUMENTS TO BE SUPPLIED WITH DELIVERY WITH EACH UNIT. THESE SHALL BE SUPPLIED IN TWO COPIES & WORKABLE SOFT COPY.

### 17 ANEXURE-IV (SPECIFICATION OF INSTRUMENTS)

### 1) PRESSURE GAUGE

The Pressure gauge should confirm to the following technical specification:-

- a) The sensing element shall be SS-316bourden tube.
- b) The dial size shall be approx. 150 mm diameter.
- c) The casing shall be epoxy coated die-cast aluminium with threaded bezel ring.
- d) The movement shall be stainless steel rotary gear with nylon bearings.
- e) The process connection shall be G1/2"
- f) The over range protection should be 150% of max. range
- g) The pointer shall be 'micrometer adjustable with zero facility on front.
- h) The accuracy shall be 1% of full scale.
- i) The gauge is to be provided with pulsation dampeners.

### 2) TEMPERATURE INDICATOR

Type .	Bimetallic rigid system type. No use of mercury or any other hazardous/toxic material	
Case	Die cast aluminium alloy moisture proof case, heavily enamelled black	
Dial Size	100 mm	
Range	As per design	
Accuracy	1% of total range	
Bulb Material	½" bulb diameter made of SS. 316	
Thermo-well	SS-AISI316 (with thread size G1/2")	
Ambient Temp	60° C max.	

#### 3) MAGNETIC LEVEL SWITCH

Process Connection: - Nb25

Material: All parts coming in contact with the liquid made of stainless steel SS316

Electrical characteristics

Switch: Single pole double throw change over switch silver contact for handling the following currents

AC 250V - 5.0A DC 250V - 0.25A

Operating characteristics

Differential – 6 MM I. e. 3 MM on either side of centre line working pr & Temp. : As per design

Ambient Temp.: 60°C max.

#### **B. CHECK LIST FOR C&I ITEMS**

### Check list for OPU (DCS Based)

- 1. OPU is DCS Based with provision of operating from local controls panel as well control room; yes/ no
- 2. Plug and socket type connection for all pressure switch and level switch: yes/no
- 3. DCS/Local selector switch is provided on the Local control panel: yes/no
- 4. Relays shall be of 24 v dc and of vendor scope of supply: yes/no
- 5. List of drives to be operated through DCS is furnished along with list of instruments and alarms.: yes/no
- 6. All field instruments shall be wired to a JB which shall be in vendor scope.: yes/no
- A pressure switch at outlet of centrifuge and a level switch in anti-flood tank shall be provided for detection of liquid seal breakage.
- 8. Arrangement for Liquid seal breakage alarm is provided: yes/no
- 9. Air requirement of pneumatic valves is mentioned: yes/no
- 10. Motor efficiency meeting as per special instruction/project requirement : yes ./no
- 11. Control panel is designed for 3 phase (415 v Ac) 3 wire power supply system: yes/no
- 12. Control panel is provided with anti-vibration pads to withstand vibrations: yes/no.
- 13. Motor data sheet shall be subject to customer/ BHEL approval: yes/no
- 14. Cable glands for 415 V AC incomer is provided: yes/no
- 15. On/Off control, indication and alarms is provided in local panel as well as HMI: yes/no
- 16. Painting treatment as per addendum or special instruction mentioned in indent: yes/no.
- 17. Construction of panel as per specification/addendum: yes/no.
- 18. Price break of spare item/spare of LS switchgear given along with offer: yes/no
- 19. 20% spare terminals have been provided at panel: yes/no.
