**2.17 IS 2004** - Carbon steel forgings for general engineering purpose.

**2.18 IS 1835** – Round Steel wire for ropes

### 3.0 DESIGN AND CONSTRUCTIONAL REQUIREMENTS:

#### 3.1 Electrically operated Trolley with Hoist:

All equipments shall be designed for OUTDOOR application and suitable for ambient temperature range of 0 to 50 deg C. Purchaser will provide electric power supply at one or more points near to the monorail/ runways as required in the plant layout. Service class to be considered for design of trolley with hoist shall be as per class 2 of IS 3938. All material used for construction of different components shall individually conform to applicable standard. All welds shall conform to IS 1024 and welders shall be qualified to AWS D1.1/ ASME Section IX.

#### TROLLEY WITH HOIST

**3.1.1. HOOKS:** Hooks shall meet the dimensional, material testing & inspection requirement of IS 15560 , which ever is applicable. The hook shall be provided with standard depress type safety latch and swivel thrust bearings with hardened race. Lugs for fixing safety latch shall be either forged along with the hook or clamp type latch with lugs shall be provided. Welding of lugs not permitted. Locking arrangement shall be provided to avoid unscrewing of the hook in service. Material of hook shall be conforming to IS-2004 - 35C8 or equivalent (with minimum tensile strength 50 kg/ sqmm) and made by controlled grain forging and normalized. All the hooks shall be tested for twice the safe working load. All hooks shall be examined by MPI/ LPI & UT (UT required for hooks > 5.0 T capacity) for cracks after proof load test. The hook shall not distort or fracture. Ball & roller bearings shall not be used in these hooks for the swivel thrust bearing.

**3.1.2 WIRE ROPE:** Wire ropes shall meet the requirement of IS 2266. Shall have six strands of 37/36 wires per strand with an ultimate tensile strength of 180 kg/ sq.mm. The wire rope shall be galvanized as per IS 1835 type B. All wire ropes shall be proof load tested for 2 times of SWL/Fall. Breaking load shall not be less than five times SWL/ Fall. The rope shall be of sufficient length to retain two full wraps on the drum at lowest hook position.

**3.1.3 DRUM AND SHEAVE:** Drum shall be of welded steel or seamless steel and Sheave shall be of cast or welded steel. The drum shall accommodate all the length of rope required for the lift plus two dead wraps at each anchor point without overlap. Drum can be grooved right or left or both, and grooves shall suit the ropes used. Sheaves shall be equipped with sheave guards to retain the rope in groove.

TD-106-1 Rev No. 5	Form No.		<p style="text-align: center;"><b>PRODUCT STANDARD</b> <b>PULVERISERS</b> <b>HYDERABAD</b></p>	Product STD no.	BA 89228
COPYRIGHT AND CONFIDENTIAL The information on this document is the property of BHARAT HEAVY ELECTRICALS LIMITED, It must not be used directly or indirectly in any way detrimental to the interest of the company.				Rev No. 04	
				Page 3 of 17	

**3.1.4 GEARS AND PINIONS:** Material of construction shall be conforming to relevant Indian Standard or equivalent and case hardened. Hardness for Cross Travel & Long Travel (CT & LT) shall be in the range of 250 - 290 BHN for pinions and 215 - 255 BHN for gears. Hardness for hoisting shall be in the range of 285 - 300 BHN for pinions and 250 - 265 BHN for gears shall be maintained. However, Vendor shall maintain and ensure that gear hardness is always less than pinion hardness by atleast 35 BHN. Helical/ Spur gears shall be used for hoists, CT & LT gears. All gears and pinions shall be examined by LPI/ MPI for surface cracks after hardening. Incase of enclosed gearing, means shall be provided for ample lubrication. Such lubrication points are to be indicated in the drawing. The specification of lubricant, market trade names, quantity of lubricant requirement and frequency of lubrication shall be specified by the vendor.

**3.1.5. WHEELS:** Shall be made out of **forged** with heat treated to 175 to 200 BHN hardness. The drive gears, if any, integral with the wheel shall be of the same material and hardness. Trolley wheels for hoists shall be spur-gear type **forged** 4 wheeled & driven by motor.

**3.1.6 ROTATING AND STATIONARY SHAFTS:** The material for shafts shall be as per relevant Indian Standard or its equivalent and shall be hardened and tempered with a minimum tensile strength of 60 kg/ sq.mm and hardness shall be in the range of 175 to 250 BHN. Shafts shall be tested with UT for more than 50 mm dia. UT acceptance norms shall be as per ASME section VIII: Division 2.

**3.1.7 BEARINGS:** Shall be reputed make (FAG/SKF/TIMKEN/NSK/TORRINGTON) and shall meet relevant IS standards. All bearings shall be designed to give a minimum service life of 20 years. Only antifriction bearings shall be used.

**3.1.8 BRAKES:** Hoisting, cross travel and long travel shall be provided with electro-mechanical friction shoe type brake or conical/parallel disc type brakes. The brakes shall be released with electric power and fail safe in case of power failure. All brakes shall, irrespective of controller portion, be applied immediately on operating an emergency push button or switch. It shall be possible to arrest the load at any desired location with minimum slip. Slip with reference to speed shall be specified along with the offer.

**3.1.9. TROLLEY:** Shall be of Minimum 4 wheeled spur geared type and fabricated construction. Trolley shall be designed to suit the monorail size (which will be furnished by Purchaser during drawing approval stage).

**3.1.10 FRAME:** The frame shall be designed to proper strength, built from steel plates with bolted/ welded construction.

TD-106-1 Rev No. 5	Form No.		<p style="text-align: center;"><b>PRODUCT STANDARD</b></p> <p style="text-align: center;"><b>PULVERISERS</b></p> <p style="text-align: center;"><b>HYDERABAD</b></p>	Product STD no.	BA 89228

				Page 4 of 17	

**3.2 DOWN SHOP LEADS (DSL):** DSL system shall be designed to transfer the power supply from End user supply point to the equipment, which is moving on runway beams/monorails. The DSL system shall be of **Cable trolley type or Taut wire loop type** as per contract requirement.

**3.2.1.0 CABLE TROLLEY TYPE:** Cable trolleys shall run on “Tee” track.

The system shall consist of:

**3.2.1.1 “Tee” track.**

**3.2.1.2 Cable Trolleys**

**3.2.1.3 Flexible power cable (Fixed & Trailing)**

**3.2.1.4 Switch fuse units/ Isolators**

**3.2.1.5 Supports for Auxiliary girder or “Tee” track**

**3.2.1.6 Link chain**

**3.2.1.7 Fasteners**

**3.2.2.0 CONSTRUCTION:**

**3.2.2.1 “Tee” TRACK:** The system shall be provided with rolled sections suitable for cable trolley wheels as per the relevant Indian Standard.

**3.2.2.2 CABLE TROLLEYS:** 4 wheeled cable trolleys shall be of sturdy design constructed with suitable material. Diameter of trolley wheels shall be minimum 40 mm and with double seal roller or ball bearing. The cable trolleys shall be designed to take the load of cable and moving with the cable load smoothly on auxiliary girder or “Tee” track. Suitable arrangement shall be provided to tie the power cable and link chain with cable trolley. Vendor shall specify the construction of material selected in the offer. Arrangement drawing shall be submitted along with the offer for review. After placement of purchase order, the same shall be submitted for approval. Vendor shall indicate the weight of total cable trolley in the drawing.

**3.2.2.3 FLEXIBLE POWER CABLE:** The trailing cable shall be suitable for 415 V AC; 3 phase with neutral; 50 Hz; Elastomer insulated cable, 650/ 1100 V grade, suitable size/ rating (for all motors running simultaneously ) for the equipment under supply. The power supply flexible trailing cable shall comply with latest revision of **IS 9968**. For sub-vendor list refer clause no. 3.12.0. Vendor shall indicate the weight of total cable in the drawing.

**3.2.2.4 SWITCH FUSE UNITS or ISOLATORS:** The system shall be supplied along with suitable fuse units/ isolators to take the full load current, when the equipment (trolley with hoist) is working with maximum safe working load. For sub-vendor list refer clause no. 3.12.0.

TD-106-1 Rev No. 5	Form No.		<p style="text-align: center;"><b>PRODUCT STANDARD</b> <b>PULVERISERS</b> <b>HYDERABAD</b></p>	Product STD no.	BA 89228
COPYRIGHT AND CONFIDENTIAL The information on this document is the property of BHARAT HEAVY ELECTRICALS LIMITED, It must not be used directly or indirectly in any way detrimental to the interest of the company.				Rev No. 04	Page 5 of 17

**3.2.2.5 SUPPORTS:** The system shall be provided with suitable supports to take the load of “Tee” track, cable trolleys, power flexible trailing and other materials.

**3.2.2.6 LINK CHAIN:** The system shall be provided with suitable link chain to pull the trolleys which is with the load of cable. During pulling of cable trolleys due to Impact load, the chain shall not fail at any point. The chain shall be made out of minimum 5-mm diameter carbon steel wire.

**3.2.2.7 FASTENERS:** Suitable fasteners shall be provided. Fasteners shall be electro-galvanized/ Hot dipped.

### 3.2.3 CONSTURCTION:

**3.2.3.1 Bracket:** Suitable size and material shall be provided to take the load of cable and axial force by the end hook.

**3.2.3.2 End hook:** Suitable end hook shall be provided for the size of steel wire rope.

**3.2.3.3 Flexible power cable (Fixed & Trailing) :** The trailing cable shall be suitable for 415V AC; 3 phase with neutral; 50 Hz; Elastomer insulated cable, 650/ 1100 V grade, suitable size / rating (all motors running simultaneously) for the equipment under supply. The power supply flexible trailing cable shall comply with latest revision of **IS 9968**. For sub-vendor list refer clause no. 3.12.0.

**3.2.3.4 SWITCH FUSE UNITS or ISOLATORS:** The system shall be supplied along with suitable fuse units/ isolators to take the full load current, when the equipment (trolley with hoist

**3.2.3.5 )** is working with maximum safe working load. For sub-vendor list refer clause no. 3.12.0.

**3.2.3.6 Reel Insulator:** Cable reel insulators shall be of ceramic, with suitable size of stretch wire. Suitable arrangement shall be provided in the reel insulator to tie the trailing cable with nylon rope or leather belt.

**3.2.3.7 Steel wire rope:** Steel wire rope shall be of minimum 6 mm diameter as per latest revision of IS 2266. Steel wire rope shall be suitably sized for load of cable without sagging for the total travel length.

**3.2.3.8 Rope clamp & thimble:** Suitable rope clamps and thimbles shall be provided to tie the rope with bracket through end hook.

**3.2.3.9 Leather belt or nylon tie:** Leather belt or nylon tie shall be supplied to tie the trailing power cable with reel insulator.

**3.10.0 CABLING:** Vendor shall include all the power and control cables necessary for the system. The cable shall comply with **IS 9968**. The power cable shall be of copper PVC flexible and vendor shall indicate the conductor size and over all size in the offer for all the motors. The control cable shall be armored of 1.5 sqmm copper conductor only. The no. of cores, cable size etc shall be indicated in the offer. There shall be 20% spare cores available for all control cables offered.

**3.11.0 EARTHING:** All electrical equipments (motor, control cabinet etc.,) shall be provided with required elements (like bolt, washer, nut etc.) for proper earthing at site.

**3.12.0 For the Approved Sub-Vendor/ Make List for Mechanical, Electrical & Control Items etc. *Vendor shall refer to Specification No.BA73011/ rev.04:***

**3.13 NAME PLATES:**

**3.13.1** Name plates shall be provided with non-corrosive material.

**3.13.2** Name plates shall have details of the equipment, model no., type, capacity, lift, span, and motor & brake details.

**3.13.3** All lubrication points shall be provided with name plates.

**4.0 PAINTING, PROTECTION, PACKING, SUPPLY and IDENTIFICATION:**

**4.1 SURFACE PREPARATION:** Weld slag & spatter shall be removed and the surfaces to be coated shall be free from contamination. Surface defects shall be removed by suitable methods. Sharp edges shall be smoothened by grinding. Prior to surface preparation oil, grease, drilling emulsions, cutting emulsions and preservative agents shall be carefully removed by suitable solvents. The surface shall be carefully dried with clean cloths to prevent the dissolved impurities from spreading over the entire surface. The surface shall be cleaned by wire brush and shot blasting, if required. Proper adhesiveness of paint to the surface shall be ensured.

**4.2 PAINTING:** Two coat of red oxide with minimum 40 microns DFT as per IS 2074 and two coats of synthetic enamel paint with minimum 40 microns DFT as per IS 2932.

**4.2.1 COLOUR SCHEME**

<b>4.2.1.2 Trolley with hoist</b>	:	<b>Golden Yellow RAL No.1004</b>
<b>4.2.1.5 Hook</b>	:	<b>Signal Red RAL No.3001</b>
<b>4.2.1.6 Chain Pulley systems</b>	:	<b>Golden Yellow RAL No.1004</b>
<b>4.2.1.7 Identification Tag/Band</b>	:	<b>White RAL9010</b>

**COPYRIGHT AND CONFIDENTIAL**

The information on this document is the property of BHARAT HEAVY ELECTRICALS LIMITED, It must not be used directly or indirectly in any way detrimental to the interest of the company.

- 4.3** All the dispatchable units shall be packed in a wooden case with water proof material.
- 4.4** The material shall be despatched with clear bill of material for each system.
- 4.5** Each and every dispatchable item shall be identified with Item number, Purchase order reference number and tagged properly for easy identification.
- 5.0 INSPECTION AND TESTING:**
- 5.1** Purchaser's and End User's representative shall have access to the works of Vendor at all reasonable times for the purpose of witnessing the purchased equipment being tested as per approved QAP document.
- 5.2** All electrical and mechanical equipment like motor, ropes, cables, electrical control panel etc. shall be tested as per the relevant IS standard at the Vendor's/ Sub-vendor's works.
- 5.3** The Trolley with hoist shall be run 5 times at manufactures works. All the 5 runs shall be tested with 125% safe working load with out any pause. The motor currents shall be checked and shall be with in the rated full load current of each motor at safe working load. The hoist shall be capable of lifting load from mid-air and moving the load without any problem. Normal speed shall be achieved during full load tests. Headroom variation shall be checked & allowable variation is 50 mm only. Hook approach shall be checked as per approved drawing.
- 5.4** The brakes of hoisting, and cross travel shall be tested with 125% safe working load. The brakes shall be capable of holding this load, when the load is suspended by the hoist hook. Maximum slip (braking path) shall be as per approved data sheet/ drawing.
- 5.5.** Test shall be conducted for effectiveness of automatic devices for hoist to limit the upward/ downward & travel of hoist . Top limit switch/(torque switch or thermal overload relay) shall be checked at vendor's works. Others shall be checked at site by Purchaser/ End user and if found defective, the same shall be replaced at free of cost by vendor.
- 5.6** Over load relay shall be tested for lift & cross travel and sustain 125% safe working load. Long travel with 125% SWL shall be tested at site by Purchaser/ End user and if found defective, the same shall be replaced at free of cost by vendor.
- 5.7** Trolley with hoist gears shall be tested with & without load for alignments and smooth operation.
- 5.8** Equipment shall be tested for hoisting and cross travel with 125% SWL.
- 5.9** Hoisting and cross travel speed shall be tested and shall ensure the tolerance with in 10%. Hoisting and CT shall be tested for minimum 2.0 m (for hoisting- height & for cross travel-length). Long travel speed shall be tested at site. Vendor shall be responsible for meeting

					Page 13 of 17

**5.13.4** Test for high voltage and measurement of insulation resistance shall be conducted.

**5.13.5** Degree of protection test report shall be submitted (type test report).

**5.13.6** The satisfactory operation of each controller, switch, contactor relay, other control devices, the connectors of all circuits and protective devices shall be tested under the most unfavorable conditions.

**5.13.7** TC for control panel, pendant stations and motors shall be provided. Weather protection type test certificate shall be furnished. Drawing showing constructional features of item subjected to weather protection test should form part of test certificate and drawing no. shall appear on TC.

## **6.0 DOCUMENTS BY VENDOR**

### **6.1 Documents along with the offer:**

**6.1.1** General arrangement, DSL drawings with complete bill of materials. All dispatchable components/ assemblies shall be indicated in detail. Sub-vendor items, make also shall be indicated in the drawing.

**6.1.2** Wiring circuit diagram with details of make, type and rating of all components.

**6.1.3** Spares list for 3 years of trouble free operation along with price. Commissioning / Initial spares shall form part of the base offer.

**6.1.4** Write up on special features if any.

**6.1.5** Technical specification for equipment.

**6.1.6** Catalogues and other details of the product shall be submitted along with the offer.

**6.1.7.** Deviation: Any deviation to specification shall be clearly spelt out in the offer itself. During Contract/ Delivery/ Installation Stages, no deviation will be entertained.

**6.1.8.** Exclusion: Any exclusion from scope of supply shall be clearly spelt out in the offer itself. Exclusion of major/ critical items shall make the offer liable for rejection.

## **7.0 DOCUMENTS AFTER PLACEMENT OF PURCHASE ORDER: (Three Sets)**

### **7.1 Quality plan shall be submitted by vendor for Purchaser's approval**

**7.2** Dimensional drawings of, Trolley with Hoist, Down shop Leads, Cable trolley, control panel and wiring diagram with BOM for approval. Data Sheet for hoists for Purchaser/ End Users approval.
