### **RISK PURCHASE**

- 1.1. In case the Supplier / Contractor fails to supply or fails to comply with terms & conditions of the Purchase Order / Contract or delivers equipment / material not of the contracted quality or fails to adhere to the contract specifications or fails to perform as per the activity schedule and there are sufficient reasons even before expiry of the delivery / completion period to justify that supplies shall be inordinately delayed beyond contractual delivery / completion period, BHEL reserve the right to cancel the Purchase Order / Contract either in whole or in part thereof without compensation to Supplier / Contractor and if BHEL so desires, may procure such equipment / material / items not delivered or others of similar description where equipment / material / items exactly complying with particulars are not readily procurable in the opinion of BHEL which is final and in such manner as deemed appropriate, at the risk and cost of the Supplier / Contractor and the Supplier / Contractor shall be liable to BHEL for any excess cost to BHEL. However, the Supplier / Contractor shall continue execution of the Purchase Order / Contract to the extent not cancelled under the provisions of this clause.
- **1.2.** Risk & Cost Clause, in line with Conditions of Contract may be invoked in any of the following cases:
  - i) Contractor/ supplier's poor progress of the work vis-à-vis execution timeline as stipulated in the Contract, backlog attributable to contractor/ supplier including unexecuted portion of work/ supply does not appear to be executable within balance available period considering its performance of execution.
  - ii) Withdrawal from or abandonment of the work by contractor/supplier before completion as per contract.
  - iii) Non completion of work/ Non-supply by the Contractor/ supplier within scheduled completion/delivery period as per Contract or as extended from time to time, for the reasons attributable to the contractor/ supplier.
  - iv) Termination of Contract on account of any other reason(s) attributable to Contractor/ Supplier.
  - v) Assignment, transfer, subletting of Contract without BHEL's written permission resulting in termination of Contract or part thereof by BHEL.
  - vi) Non-compliance to any contractual condition or any other default attributable to Contractor/ Supplier.

### 1.3. Risk and Cost amount against Balance Work:

In case Risk & Cost is invoked, the amount of Risk & Cost against balance work shall be calculated as under:

Risk & Cost Amount=  $[(A-B) + (A \times H/100)]$ 

Where,

A= Value of Balance scope of Work/ Supply (\*) as per rates of new contract

**B**= Value of Balance scope of Works/ Supply (\*) as per rates of old contract being paid to the contractor/ supplier at the time of termination of contract i.e. inclusive of PVC & ORC, if any.

**H** = Overhead Factor to be taken as 5 (five)

In case (A-B) is less than 0 (zero), value of (A-B) shall be taken as 0 (zero).

### \*(Balance scope of work/ supply)

Difference of Contract Quantities and Executed Quantities as on the date of issue of Letter for 'Termination of Contract', shall be taken as balance scope of Work / Supply for calculating risk & cost amount.

Contract quantities are the quantities as per original contract. If, Contract has been amended, quantities as per amended Contract shall be considered as Contract Quantities.

Items for which total quantities to be executed have exceeded the Contract Quantities based on drawings issued to contractor from time to time till issue of Termination letter, then for these items total Quantities as per issued drawings would be deemed to be contract quantities.

Substitute/ extra items whose rates have already been approved would form part of contract quantities for this purpose. Substitute/ extra items which have been executed but rates have not been approved, would also form part of contract quantities for this purpose and rates of such items shall be determined in line with contractual provisions.

However, increase in quantities on account of additional scope in new tender shall not be considered for this purpose.

NOTE: Incase portion of work is being withdrawn, contract quantities pertaining to portion of work withdrawn shall be considered as 'Balance scope of work/supply' for calculating Risk & Cost amount.

### 1.4. LD against delay in executed work/supply in case of Termination of Contract

LD against delay in executed Work /Supply shall be calculated in line with LD clause of the contract for the delay attributable to contractor/ supplier. For this purpose, contract value shall be taken as Executed Value of work/supply for the purpose of limiting maximum LD value.

Method for calculation of "LD against delay in executed Work/ supply" is given below:

- i) Let the time period from scheduled date of start of work till termination of contract excluding the period of Hold (if any) not attributable to contractor/ supplier= T1
- ii) Let the value of executed work/ supply till the time of termination of contract= X
- iii) Let the Total Executable Value of work/ supply for which inputs/fronts were made available to contractor/ supplier and were planned for execution till termination of contract = Y
- iv) Delay in executed work/ supply attributable to contractor/supplier i.e.  $T2=(1-\frac{x}{y})x$
- v) LD shall be calculated in line with LD clause of the Contract for the delay attributable to contractor/ supplier taking "X" as Contract Value and "T2" as delay attributable to contractor/ supplier.

Note: In case portion of service/ supply is withdrawn, no LD shall be applicable for portion of service/ supply withdrawn.

### 1.5. Recovery from Supplier

Recoveries from contractor/ supplier on whom risk & cost has been invoked shall be as per <u>Clause No. 23 of GTC.</u>

### **Price Adjustment (Annexure-I)**

Prices payable to the Vendor, in accordance with the Contract, shall be subject to adjustment during performance of the Contract to reflect changes in the cost of labour and material components, in accordance with the following provisions:

<u>A)</u> The indices for price adjustment shall necessarily be of the country of origin of goods/ labour and shall be well established and nationally recognised in that country. Preferably Government indices shall be used.

### Price Adjustment formula is as below:

EC- EC<sub>1</sub>- EC<sub>0</sub>

EC<sub>1</sub> will be computed as below-

$$EC_1 = EC_0 \times [F + a^*(A_1 \mid A_0) \cdot f_1 + b^*(B_1 \mid B_0) \cdot f_2 + c^*(C_1 \mid C_0) \cdot f_3 + L_b^*(L_1 \mid L_0) \cdot f_{Lb}]$$

Where,

EC = Adjustment to Ex-works price component expressed in the currency of the Contract payable to the vendor for each shipment/ despatch.

EC<sub>1</sub> = Adjusted amount of Ex-works price component expressed in the currency of the Contract payable to the vendor for each shipment/ despatch.

 $EC_0 = Ex$ -works price for equipments in the currency of Contract, shipment / dispatch wise.

- The Fixed portion of the ex-works component of the Contract Price (F) shall be 0.15
- a,b,c etc shall be co-efficients of major materials/ items involved in the Ex-works component of the Contract price. The sum of these co-efficients shall be between 0.50 to 0.60
- A,B,C etc shall be published price indices of corresponding major materials/items. Such indices shall necessarily be of the country of origin of goods.
- 'L<sub>b</sub>" shall be co-efficient for labour component in the Ex-Works/FOB Component of the Contract Price which shall be between 0.25 to 0.35.

'L' shall be labour index.

- Sum of all the material co-efficients and the labour co-efficient shall be 0.85.

 $f_1$ ,  $f_2$ ,  $f_3$ ,  $f_{Lb}$  etc =  $f_1$ ,  $f_2$ ,  $f_3$  etc. are Exchange Rate Correction Factors for the respective materials and fLb is the Exchange Rate Correction Factor for labour with reference to the currency of the country of origin of index and the respective Contract currency, such that

$$f = \frac{Z_0}{Z_1}$$

where Z is the no. of units of the currency of the country of the origin of index, which is equivalent to one unit of the respective Contract currency. The exchange rates to be used for calculation of factor 'f' shall be as per Bills Selling Exchange Rates established by the STATE BANK OF INDIA.

For the indices, subscript '0' refers to indices as on 30 days prior to date of Technocommercial bid opening. For 'Z<sub>0</sub>' subscript '0' refers to value as on the date of Technocommercial bid opening.

Subscript '1' refers to indices/exchange rates as of:

- three months (for Labour Indices) /ninety (90) days (for Exchange Rates) prior to the date of shipment/despatch for labour and Exchange Rates respectively, and
- (b) at the expiry of two third (2/3) period from the date of Notification of Award to the date of shipment/despatch, for material.

For the purpose of this clause the date of shipment/despatch shall mean the schedule date of shipment/despatch or actual date of shipment/despatch whichever is earlier. The schedule date of shipment/despatch shall be as identified in line with provisions of Time Schedule of the Contract.

In case of shipments/dispatches which are delayed beyond the schedule date of shipment/despatch for reasons attributable to the Vendor, the price adjustment provision shall not be applicable for the period of time between the schedule date of shipment/despatch and the actual date of shipment/despatch. For this purpose, the schedule date of shipment/despatch shall be as identified in line with provisions of Time Schedule of the Contract.

The above formula for price adjustment will be applicable if the currency in which the Contract Price is expressed is different from the currency of the country of origin of labour and material indices. In other cases, formula shall be applied without the Exchange Rate Correction Factor 'f'.

- **B)** The following components of the contract price shall not be subject to price adjustment and shall remain firm during the execution of the contract:
- (1) Ex-works price component for Maintenance and Monitoring equipment, tools and tackles etc.
- (2) Type Test Charges
