

CORRIGENDUM no-2
NIT 1763
EC 36033
Optical laser alignment kit.

The center alignment system should be suitable for bore diameters 120mm to 1700 mm. Suitable adjustable brackets/adopters/supports to cover the above range should be supplied within the quoted price. The total number of such brackets/adopters /supports (each covering a portion of the above range) should not exceed five to avoid cumbersome handling.

Also the system should have facility to upgrade for Shaft alignment for coupling/shaft dia range 200mm to 1000mm. An optional price may be indicated separately along with the main price bid for this up gradation. The optional price will indicate cost of suitable magnetic brackets/adopters and standard mechanical adjustable bracket/adopters. BHEL will not consider this optional price for price bid evaluation. Un priced details of the Optional shaft alignment upgrade shall also be provided in the Technical bid.
