

SPECIFICATION OF CARBON MONOXIDE GAS DETECTOR

Portable hand held battery operated instrument with 3 ½ digit LCD, which is used to measure Carbon Monoxide Gas **with built in catalytic chemical sensor** to read ambient CO gas levels, to as low as parts per million (PPM) present in ambient air. The instrument shall have facility to hold data of absolute value of carbon monoxide gas and data hold facility until hold data is cancelled.

SPECIFICATION:

CO Gas range	: 0 to 1000 PPM
Accuracy	: 0.5 % of the volume
Display	: 3 ½ digit LCD
Operating temperature	: 0 – 45 Deg. C, Ambient & 90 % RH
Data hold facility for absolute value	: required
Data hold facility	: peak
Alarm	: selectable Audible/visible/vibration with user adjustable set point
Low battery indication	: required.
Soft carrying case	: required.

Kindly note:

1. The instrument offered can be better than the above specifications
2. Should have service facility in India with factory trained engineers to take care of the equipment supplied To reduce the down time.
3. The produce catalog should contain only the product offered in depth preferably highlighting the model Offered.
4. Two sets of product catalogue to be enclosed with the offer in original.
5. Offer without original catalog will be rejected.
6. Vendor should submit the offer with detailed specification of product offered. The offer given “ as per your specifications “ will be rejected.
