SPECIFICATION NO. PE-TS-405-568-A003

REV 00

PRE-BID CLARIFICATION REPLY

S. N.	Bidder Query	BHEL Reply
1.	Voltage and Ampere hour of Battery.	As per specification, use of battery after charging is specified as minimum 2 Hour. Bidder is required to select suitable capacity battery accordingly, based on ambient conditions mentioned in specs, load carrying capacity of trolley and supplier's specific design to meet referred specification requirement.
2.	No. of Wheels for trolley	With reference to the capacity of the trolley mentioned in the specifications, minimum 4 wheel (or higher as per equipment design requirement) should be considered.
3.	Steering System	With reference to the capacity of the trolley, type of steering may be Electrical or Hydraulic assisted.
