Pre-bid Clarifications-3
Stacker cum Reclaimer Package for Singrauli STPP Stage-III (2x800 MW)
BHEL Tender ref. No. 77/24/6007/BPA

2.122 13.133. 13.1101 1 1/2 1/3331 A		
SI. No.	Clarification by BHEL	
TECHNICAL CLARIFICATIONS		
4	Bidder is aware that as per NTPC NIT Technical specification, the proposed yard conveyors and Stacker cum Reclaimer Machines of Stage-III (2 x 800 MW) shall be erected in the existing stockpile of Stage-I (5 x 200 MW).	
ı	Bidder to take note of Coal Stockyard layout attached as Annexure-29 in which Existing facilities (of Stage-I) & new facilities to be made for Stage-III are superimposed. Bidder to also note that dismantling of existing facilities wll happen in phased manner.	
2	As it can be seen in the Annexure-29, Existing Stage-I conveyor 11A/B is in close vicinity to Stacker cum Reclaimer Machine-2 & conveyor 11A/B will be operational during construction of Stage-III facilitiies. So bidder to accordingly plan the erection of Stacker cum Reclaimer Machine-2 without affecting the operation of conveyor 11A/B.	
3	It is planned to store crushed coal in the Limestone Handling Plant (LHP) region (Ref. Annexure-29) temporarily. So bidder has to design Stacker cum Reclaimer Machine-2 for handling coal from Stock pile-3 as well as temporary stored stock pile in LHP region, i.e., on the both sides of Yard conveyor 31B.	
4	Since Stacker cum Reclaimer Machine-2 is very close to LHP facilities on the other side of Yard Conveyor-31B, bidder to thoroughly review & adopt Machine counterweight side design suitably to avoid any fouling with LHP facilities. If required, Jib type counterweight design may be considered by bidder for Stacker cum Reclaimer Machine-2.
