Tender no. PSER:SCT:PSC-M2088:20	
<u>ANNEXURE-A of TCN-01</u>	
3.15	PRICE VARIATION COMPENSATION (PVC)
3.15.1	Price Variation Compensation is not applicable for the schedule completion period i.e. 12 (Twelve) months counting from the date of issue of LOI.
3.15.2	PVC shall be applicable only, during the extended period of contract (if any) after the scheduled completion period and only for the transportation of material between BHEL Manufacturing units and Indo- Bhutan boarder as per SCH -3 of price schedule VOL-III and for the portion of work delayed / backlog for the reasons not attributable to the Contractor.
3.15.3	PVC bill should be raised along with documentary evidence of IOCL diesel price at Kolkata.
3.15.4	The transportation cost will be derived from rate in price schedule [SCH-3 of Vol III (latest revision)] and shall be increased or decreased on account of diesel rate as per following:
3.15.4.1	Cost of transportation is composition of fixed charges (e.g. vehicle hiring charge, driver and khalasi charge etc.) and variable charges (e.g. consumable, diesel etc.). For calculation of Price variation of transportation rate due to change in diesel price, 40% of freight cost shall be considered as variable cost. The formula to calculate the increase/decrease of price shall be as following: Increase/decrease = 40% of freight cost × {(present rate of diesel/base rate of diesel) – 1} [Figure shall be rounded off to two digits after decimal.] Where, Present Rate of Diesel is the Rate of Diesel in Kolkata, India on the date of LR. Base Rate of Diesel is the Rate of Diesel in Kolkata on the date of scheduled completion. Diesel price will be obtained from official website of M/s Indian Oil Corporation Ltd. i.e. www.iocl.com.
3.15.4.2	Sample Calculation: - Assume base rate of diesel i.e. HSD in Kolkata is INR 75.00/- per Litre on the date of scheduled completion period i.e. on 31.12.2021 (say). Now, assume the LR date of a consignment is 10-03-2022 and the present rate of Diesel in Kolkata on 10-03-2022 is INR 79.25/- per litre. i.e. increase of INR 4.25 per litre from base rate. Assuming freight charge of the consignment = INR 3,00,000/- Increase = 40% × 3,00,000 × (79.25/75.00 - 1) = 40%×3,00,000×0.06=7200 Therefore, PVC for the subject consignment= INR 7200/- (Payable) The same formula will be followed for decrease in Diesel Prices also.
3.15.5	The total amount of PVC shall not exceed 15% of the cumulatively executed contract value. Executed contract value for this purpose is exclusive of PVC, ORC, Supplementary/Additional Items and Extra works except extra items due to quantity variation.
