REQUEST FOR QUOTATION

BHARAT HEAVY ELECTRICALS LIMITED Electronics Division PB No. 2606, Mysore Road Bangalore - 560026

AKSPROP076

RFQ NUMBER:

RFQ DATE: 12.12.2023

Due Date/D	ay: 26.12.2023 T	UE
Time	: 13:00 HRS	
4		

MMI:PU:RF:003

(address for communication):

PU:RF:003

INDIA

(for all correspondence)

Purchase Executive : ABHISHEK

Phone : 26998102 Fax : 00918026989215 E-mail: singh.abhishek@bhel.in

1)This RFQ is for entering into Rate contract (RC) with BHEL for the tendered item. Validity of the RC will be 1 year from the award of rate contract. Firm orders will be placed during the tenure of rate contract. Prices will remain firm till the validity of RC or till the completion of supplies against the Purchase Orders placed against this rate contract whichever is later. Please note that these quantities are projections based on the current business scenario and expected orders from customers. In the eventuality of business not coming through, BHEL is not obligated to exhaust the ordering of RC quantities.

2)Reverse Auction Clause: BHEL shall be resorting to Reverse Auction (RA) (Guidelines as available on www.bhel.com) for this tender. RA shall be conducted among all the techno-commercially qualified bidders. Price bids of all techno-commercially qualified bidders shall be opened and same shall be considered as initial bids of bidders in RA. In case any bidder(s) do(es) not participate in online Reverse Auction, their sealed envelope price bid along with applicable loading, if any, shall be considered for ranking.

SPECIFICATION FOR 0.12µF SNUBBER CAPACITOR

Brief description

Snubber circuits are energy-absorbing circuits used to suppress the voltage spikes caused by the circuit's inductance when a switch, electrical or mechanical, opens. It limits or stops (snubs) switching voltage amplitude and its rate of rise, therefore reducing power dissipation. This circuit is used in semiconductor devices for protection and performance enhancements.

The capacitor in this specification is the snubber capacitor used in IGBT propulsion systems.

1. Detailed Specification

1. Electrical Parameters				
Capacitance	0.12 μF +/-10%			
Rated Voltage	4000V			
Rated DC Voltage	3000V DC			
Rated RMS Voltage	1400 VAC			
Rated Current	20A			
Peak Current	480A			
Test Voltage b/w terminals	DC 6000V/10sec			
Tangent of Loss Angle	2*10-4			
Self-Inductance	<10nH			
Voltage raise	4000V/us			
Cooling	Natural Convection			
2. Environment Para	meters			
Minimum ambient temperature	- 40°C			
Maximum ambient temperature	+70°C			
Minimum casing temperature	- 40°C			
Maximum casing temperature	+75°C			
Storage temperature	- 40°C to +85°C			
3. Technology				
Dielectric	Polypropylene film metallized, self-healing			
Filling material	Resin, polyurethane dry			

COPYRIGHT AND CONFIDENTIAL

4. Bushing				
Internal thread	M6 depth 8mm			
Max. torque	6 Nm			
Air distance	79 mm			
Creepage distance	79 mm			
5. Mechanical P	arameters			
Diameter	55 mm			
Height	59 mm			
Weight	0.1 kg			
Casing material	plastic			
Mounting position	every position			
Clearance distance b/w terminals	>=60 mm			
Clearance distance b/w terminals and				
case	>=40 mm			
Colour	GREY RAL 7031			
Shock Resistance	As per IEC 61373			
Vibration	As per IEC 61373			

2. Standards

4. Ambient conditions / operating conditions

	Description	Value	Unit	Notes
	Operating Temperature	-25+85	°C	
	Temperature distribution over the year	+75	°C	10 days/year
	r r	+65	°C	20 days/year
.		+55	°C	90 days/year
ıpan.		+40	°C	100 days/year
E		< +40	°C	130 days/year
me	Storage	-25+70	$^{\circ}\mathrm{C}$	3 3
rest of	Average year temperature	+ 40	°C	
it must not be used directly of indirectly in anyway detrimental to the interest of the company.	Relative humidity	< 95	%	During app 3 - 4 months (rainy season) per year frequent condensation can occur
y detrin	Altitude	<1200	m	occur
anywa	Pollution levels			
Ë	Operation in coastal areas			
ecti.	Maximum PH	8.5		of water damp
ngi	Max. concentration of sulphate	7	mg/liter	of water damp
[Max. concentration of chlorine	6	mg/liter	of water damp
reculy	Maximum conductivity	130	μS/cm	of water damp
sed a	Operation in desert terrain			
pe n	Dust content in air	1.6	mg/m3	

5. Reliability, availability, maintainability and safety

Description	Value	Unit	Notes
Design life	30	years	Expected lifetime: $30 \times 8640 = 260000$ hours
Failure rate Maintenance	50	FIT	To be defined by supplier
Safety			The risk of explosion due to over voltage, ageing, loss or other reasons should be minimized

7. Testing

List of tests to be performed on prototype as per IEC 61881 are as follows

Sl No	Test	Acceptance criteria	Type/Routine Test
1	Capacitance and Tanδ measurement	Measurements should be within the tolerances specified by the manufacturer	Type/Routine
2	Dimensional check	Dimensions to comply with the Approved drawing	Type/Routine
3	Voltage test between terminals and case	During the test neither flashover nor puncture should occur.	Type/Routine
2 3 4 5 7 8	Voltage test between terminals	During the test neither flashover nor puncture should occur. Capacitance measured after the test should be within the range specified	Type/Routine
5	Surge discharge test	After conducting the test capacitance to be measured and the change should be < +/-1%	Type
6 7 8 9 10	Thermal stability test and loss angle tangent measurement test	No breakdown of the capacitor should occur during the test. The capacitor losses should be measured after the test and should be within the tolerances specified by the manufacturer	Type
	Self-healing test	Change of capacitance after the test should be < +/- 0.5%	Type
	Resonance frequency measurement	The self-inductance measured should be within the tolerances specified by the manufacturer	Туре
	Environmental Test 1. Damp heat test 2. Change of temperature	Change of capacitance after the test should be < +/-2%	Type
	Mechanical tests Mechanical tests of terminals 1. External inspection 2. Vibration and shocks	No mechanical damage should occur after the test.	Type
	Endurance test	Change of capacitance after the test should be < +/-3%	Type

8. Rating plate

The following information shall be given on the rating plate of each capacitor unit:

- 1. Manufacturer
- 2. Identification number and manufacturing date
- 3. $C = \mu F$
- 4. Tol = %
- 5. UNDC or UN = V
- 6. θ min = $^{\circ}$ C
- 7. θ max = $^{\circ}$ C
- 8. Maximum tightening torque = Nm

9. Documentation

- 1. Datasheet
- 2. Dimensional Drawing
- 3. Type test Procedure, Type test Report
- 4. Routine test Procedure, Routine test Report

10. Acceptance

- 1. Routine test report to be submitted along with each delivery
- 2. Equipment shall be packed in a manner suitable for delivery and storage at the appointed delivery address. Transport packaging will provide adequate protection against accidental damage during normal handling. Terminals, leads, mounting brackets will be protected from mechanical damage

Notes:

- 1. Mounting dimensions needs to be strictly adhered as per the approved drawing submitted by the vendor
- 2. Supplier should try to minimize the self-inductance and series resistance to a lower value as much as possible
