NOTES:

- 1. This RFQ is governed by:
- a) INSTRUCTIONS TO BIDDERS/SELLERS and GENERAL CONDITIONS OF CONTRACT FOR PURCHASE available at http://edn.bhel.com (RFQ-PO Terms & Conditions)
- b) Any other specific Terms and Conditions mentioned.

* The HSN/SAC no mentioned against the line items in the RFQ are indicative only.

For and On behalf of BHEL.

ABHISHEK Control Equipment

1 OF 1

1. SCOPE

The Pre-Qualification Requirement document specifies the requirements to be met by the vendors (hereafter called Bidder) who wish to participate in the tender for supply of 1085µF Resonant Capacitor for rolling stock applications.

This PQR should be read in conjunction with the Purchase Technical Specification **PS4452714 R00 dtd 03.02.2021.**

2. CREDENTIAL

- a) The Bidder should be Manufacturer or authorized dealer / supplier of -1085μF Resonant Capacitor used in Rolling Stock applications. Documentary proof like relevant POs / invoice copies, valid authorization certificate etc shall be provided along with the offer.
- b) The Rolling Stock Applications under consideration shall include Locomotive, EMU, MEMU, Metro Trains, High Speed Trains, Train sets, Inspection Cars and Special Track Machines.
- c) For the vendors outside India, documentary proof for usage of the product in rolling stock applications shall be submitted. Acceptance of such certification shall be at BHEL's discretion.
- d) The Bidder should not be under the category of "hold" or "blacklisted" by any of the BHEL units/ any Govt of India PSU/ Govt of India/ statutory bodies of any state Govt as on date of bid submission. A declaration to this effect shall be submitted along with the offer.

3. QUALITY SYSTEM

- The manufacturer should have valid ISO 9001:2015 or latest certification covering the manufacturing and testing of the subject item
- b) The manufacturer should possess a clearly laid down quality Assurance Plan for the product covering the following aspects Organization Chart, clearly indication the quality control set up Qualification of key personnel and officials deployed in the quality control cell.
- c) Process Flow Chart indicating process of manufacture for an individual product or for a family of products, if the process is same.
- d) Quality Assurance System Inspection and Testing plan to cover
 - Incoming material
 - Process control
 - Product control
 - System control
 - Testing facility
- e) Stage inspection details shall include the inspection procedure, inspection parameters, method of testing/ test procedure, sample sizes for destructive & non-destructive testing etc.
- f) Calibration scheme and status of calibration of test equipment
 The process, testing and measuring equipment shall be duly
 calibrated by approved agency and the validity of calibration should
 be current.

4. GENERAL REQUIREMENTS

- a) It is preferred that the bidder is the manufacturer of this item. If the bidder is importing some portion of the components, then minimum value addition in India shall be 20%. Bidder to confirm this in the offer. Value addition less than 20% is not acceptable. A declaration to this effect shall be submitted along with the offer.
- b) The technical bid of bidders, which qualify technically but are not approved for the subject item by the Customer Approving Authority, shall be referred by BHEL to the customer Approving Authority for approval with intimation to the bidder. Consequent to the decision of Customer Approving Authority, the bidder shall be added to the vendor list of the subject item for future tenders. Concurrently BHEL shall consider placing developmental order on the bidder after accessing the capability of the bidder to manufacture / develop the subject item. However, BHEL shall treat the offer as "Not meeting" Pre-Qualification Criteria for the subject tender.
- c) The Customer Approving Authority shall be RDSO/CLW/BLW/PLW/ICF/RCF/MCF or any other agency as designated by the Customer.
- d) The bidder should possess a valid type test report, not older than five years, as per relevant standards mentioned in the specification with respect to time during the bid submission in case of catalog items. In case of custom made items, a bidder can submit the type test report of an item of similar or higher rating with a declaration for conducting the type test in case of award of order or developmental order. The bidder can also submit the test reports conducted in their own facility with the document of their lab accreditation. However, BHEL reserve it's right to insist on conducting the Type test again in a laboratory of it's choice.
- e) For the bid of vendors already qualified and appearing in BHEL's source list, the requirement of type test report and proof of supply shall not be applicable.

5. DOCUMENTATION TO BE SUBMITTED ALONG WITH OFFER

- a) Documentary proof for experience as per clause 2.a
- b) Clause by Clause compliance to the technical specification
- c) Declaration regarding status as per clause 2.d
- d) Declaration on MII (Make in India) as per clause 3.a
- e) Declaration for conducting Type Test as per clause 3.d

1085µF RESONANT CAPACITOR

GROUP: TRACTION ENGINEERING

SPECIFICATION FOR 1085µF RESONANT CAPACITOR

Brief description

A 100Hz ripple voltage arise because of the single –phase powered and DC loaded system. To reduce the 100Hz DC-link ripple voltage a series resonant filter is used. This filter comprises an inductor and a capacitor bank. The series resonant circuit serves to filter out the current at double the line frequency, and is tuned to this frequency.

This document specifies a 100Hz series resonant capacitor, used in IGBT propulsion systems. A simplified schematic of the main power scheme can be found in Figure 1: Simplified main power **scheme**.

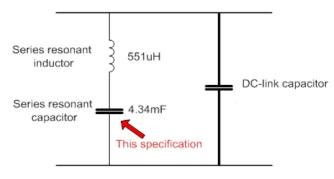

Figure 1: Simplified main power scheme

The capacitor will be fitted in the traction converter cubicle. It will be natural cooled, no forced ventilation. **The capacitor must be dry, oil filled is not allowed.**

1. Detailed Specification

1. Electrical Parameters				
Capacitance per Capacitor	1085 μF +/-5% (4 capacitors in parallel)			
Rated DC Voltage	2800 VDC			
Maximum Voltage	3640 V			
Rated Current	300 Arms 1200A for 4 capacitors in parallel			
Test Voltage b/w terminals	DC 5265V/10sec			
Test Voltage b/w terminals	AC 6900V/60sec			
Series resistance	<0.28mΩ			
Tangent of Loss Angle	2*10 ⁻⁴			
Self Inductance	approx. 100nH			
Maximum Peak Current	25 kA			
Maximum Surge Current	75 kA			
Cooling	Natural Convection

7. Testing

Sl No	Test	Acceptance criteria	Type/Rout Test
1	Capacitance and Tanδ measurement	Measurements should be within the tolerances specified by the manufacturer	Type/Routi
2	Dimensional check	Dimensions to comply with the Approved drawing	Type/Routi
3	Voltage test between terminals and case	During the test neither flashover nor puncture should occur.	Type/Routi
4	Voltage test between terminals	During the test neither flashover nor puncture should occur. Capacitance measured after the test should be within the range specified	Type/Routi
5	Surge discharge test	After conducting the test capacitance to be measured and the change should be < +/-1%	Type
6	Thermal stability test and loss angle tangent measurement test	No breakdown of the capacitor should occur during the test. The capacitor losses should be measured after the test and should be within the tolerances specified by the manufacturer	Type
7	Self-healing test	Self-healing test Change of capacitance after the test should be < +/- 0.5%	Type
8	Resonance frequency measurement		
9	Environmental Test 1. Damp heat test 2. Change of temperature	Change of capacitance after the test should be < +/-2%	Type
10	Mechanical tests Mechanical tests of terminals 1. External inspection 2. Vibration and shocks	No mechanical damage should occur after the test.	Type
11	Endurance test	Change of capacitance after the test should be < +/-3%	Type
