Notes :	
1.0	For Barstock Thermowell, Extension Length shall be Minimum 30mm above the Insulation on pipe and Minimum 30 mm when there is no insulation on pipe. Minimum number spares qty indicated in specification, actual Mandatory spares qty shall be 10% of Total Qty for each type, Each Process Connection Size and Each Thermowell size (L&EL) OR Minimum One Number of each type, Each Process Connection Size and Each Thermowell size (L&EL) whichever is higher shall be included as mandatory spares.
2.0	Note: It is responsibility of bidder to calculate mandatory spares correctly, vendor can chose the length of IL and EL to optimize the mandatory spares qty without affecting the specification requirement. No commercial implication will be allowed for change in mandatory spares quantity due to calculation of WFC. During databasheets submission if BHEL finds that Thermowell length has to be corrected as per ASME PTC 19.3 2010 and if it results in change of qty in mandatory spares then no commercial implication will be allowed. However, if change of IL is due to inputs such as Operating and design parameters furnished by BHEL, then commercial implications due to those changes will be allowed.
