

### List of Maintenance & Testing Equipments at Pusauli

| Sl. No. | Maintenance & Testing equipment                        | Unit | Qty |
|---------|--------------------------------------------------------|------|-----|
| 1       | BDV Test kit                                           | Nos. | 1   |
| 2       | Megger 5 kV                                            | Nos. | 1   |
| 3       | Digital multimeter                                     | Nos. | 1   |
| 4       | Oil sampling bottle                                    | Nos. | 3   |
| 5       | Portable SF6 gas refilling device                      | Nos. | 1   |
| 6       | Capacitance and tan delta kit                          | Nos. | 1   |
| 7       | Transformer winding resistance meter                   | Nos. | 1   |
| 8       | Transformer turns ratio meter                          | Nos. | 1   |
| 9       | Dew point kit for SF6 gas.                             | Nos. | 1   |
| 10      | SF6 gas evacuating, filtering and drying plant         | Nos. | 1   |
| 11      | Transformer oil filtration plant (4 KL / Hr. capacity) | Nos. | 1   |
| 12      | Circuit breaker test kit                               | Nos. | 1   |
| 13      | Primary current injection kit                          | Nos. | 1   |
| 14      | Secondary current injection kit                        | Nos. | 1   |
| 15      | Relay operation timer                                  | Nos. | 1   |
| 16      | Selective level meter                                  | Nos. | 1   |
| 17      | Selective level generator                              | Nos. | 1   |
