SPECIAL TERMS AND CONDITIONS

Tender Enquiry No. 2526-013E Dated 13.05.2025 **Due date 24.05.2025**

Tender Description: Purchase of HSFG Fasteners and Plain Chamfered Washers

- Order of enquiry item Sl. no. shall be maintained in the quotation.

S8. REVERSE AUCTION

Reverse auction will be conducted in this tender enquiry.

S9. DIFFERENTIAL FREIGHT CLAUSE

The rates finalized against each schedule shall include cost of transporting finished products from Vendor's Works to delivery location specified in the tender.

All the consignments are normally envisaged for dispatch from Vendor's Works to specified location in the tender. However, depending upon requirement, BHEL may ask the vendor to despatch the consignments to different project sites/BHEL units or other location within India and vendor shall deliver the material at this revised destination. BHEL's decision shall be final in this regard. In such case, differential freight charges shall be deducted or paid based on applicable distance. BHEL reserves the right to change the delivery destination in already released POs on vendor or before releasing new PO.

Differential Rates will be calculated as below:

If BHEL advises to despatch material at any other location, then BHEL will calculate freight portion from vendor works to Location specified in tender (say it comes out amount 'X') and from vendor works to New location specified by BHEL (say it comes out amount 'Y'). Then differential freight cost will be calculated by subtracting both freight cost (Y-X). If it comes out to be positive, then this differential cost shall be given extra to vendor. If it comes out to be negative, then this differential amount shall be deducted from vendor. Kindly note that this extra payment to vendor/deduction from vendor shall be amended suitable in Purchase order before despatch.

For Calculation of Transportation freight, BHEL has mentioned Rate/KM/MT in INR from anywhere to anywhere in India. For calculating total cost, this needs to be multiplied by distance in KM & weight in MT.

Rate/KM/MT from anywhere to anywhere is mentioned below:

Table 4

Relevant category	Freight Rate per MT per KM	Remarks
TAAA2	3.30	Anywhere to anywhere in India

Distance shall be taken in KM as shortest distance from Google map.

Example: Suppose one vendor is located in Ludhiana (Punjab). Distance from Ludhiana to BHEL Goindwal is approx. 110 KM & distance from Ludhiana to Talcher site is approx. 1700 KM. The specified destination in tender is Talcher and the new location specified for delivery of material is Goindwal. Suppose weight of consignment is 60 MT

Then freight from Ludhiana to Goindwal (Y) comes out to be Rs. $3.30 \times 150 \times 60 = \text{Rs. } 21,780.00$. The freight from Ludhiana to Talcher (X) comes out to be Rs. $3.30 \times 1900 \times 60 = 3,36,600.00$. Now differential

NOTE The popular lengths are defined in terms of lengths $\sum t_{\min}$ and $\sum t_{\max}$.

^a For proper function of the proloaded bolted joint the following condition for the clamp length $\sum t$ shall be fulfilled:

$(l_{g \max} + 2P) < \sum t < (l_{\min} - P - m_{\max})$, where P is the pitch of thread and m_{\max} is the maximum nut height according to Table 5.

The values of $\sum t_{\min}$ and $\sum t_{\max}$ specified in Table 3 are within this range.

The $\sum t_{\max}$ values are specified on the condition that the minimum bolt protrusion beyond the unloaded nut face shall be 1 P .

2.2 SPECIFICATION FOR BOLTS AND REFERENCE STANDARDS

Hexagon fit bolt shall be hot dip galvanized.

^a For the time being EN 14399-1 refers only to EN 14399-3 and EN 14399-4 as far as dimensions and mechanical characteristics of the components and functional characteristics of the assemblies are concerned. Such references shall also apply to EN 14399-8. ^b The tolerance class specified applies without surface finish. Hot-dip galvanized bolts are intended for assembly with oversize tapped nuts. ^c The preparation of the test specimens with V-notch in the fastener shall be as specified in EN ISO 898-1. ^d Attention is drawn to the need to consider the risk of hydrogen embrittlement in the case of bolts of property class 10.9, when selecting an appropriate surface treatment process (e.g. cleaning and coating), see the relevant coating standards. ^e "As processed" means the normal finish resulting from manufacture with a light coating of oil. ^f Other coatings may be negotiated between the purchaser and the manufacturer provided they do not impair the mechanical properties or the functional characteristics. Coatings of cadmium or cadmium alloys are not permitted.		

2.3 MARKING OF HEXAGON FIT BOLTS

High-strength structural bolts according to this specification shall be marked with:

- a) Property class marking in accordance with EN ISO 898-1 and the letters HVP.

EXAMPLE 1 10.9 HVP
