		The Charges for Pre-Inspection would be borne by BHEL. However at least 15 days' notice is to be provided for arranging Pre-Inspection.	

**SPECIAL NOTE FOR BIDDERS:**

- In the event of our customer order covering this tender being cancelled /placed on hold /otherwise modified, BHEL would be constrained to accordingly cancel / hold / modify the tender at any stage of execution.
- BHEL may negotiate the L1 rate, if not meeting our budget / estimated cost. BHEL may re-float the tender opened, if L1 price is not acceptable to BHEL even after negotiation.
- Any change in applicable rates of Tax or any other statutory levies (Direct / Indirect) or any new introduction of any levy by means of statute and its corresponding liability for the deliveries beyond the agreed delivery date for reasons not attributable to BHEL will be to vendors account. BHEL will not reimburse the same and any subsequent claim in this respect will be summarily rejected.
- BHEL reserves its right to reject an offer due to unsatisfactory past performance by the respective Vendor in the execution of any contract to any BHEL project / Unit.
- The offers of the bidders who are under suspension and also the offers of the bidders, who engage the services of the banned firms /principal/agents, shall be rejected. The list of banned firms is available on BHEL web site [www.bhel.com](http://www.bhel.com).
- Recovery / deduction as applicable as per Direct and Indirect taxes as notified by Govt. Of India from time to time will be made and information/certificate for such deduction/recoveries shall be provided by BHEL to the vendor.
- If the delivery of supply as detailed above gets delayed beyond the delivery period, the Supplier/Vendor shall request for a delivery extension and BHEL at its discretion may extend the Contract. However, if any 'Delivery extension' is granted to the Supplier/Vendor for completion of supply, due to backlog attributable to the Supplier/Vendor, then it shall be without prejudice to the rights of BHEL to impose LD for the delays attributable to the Supplier/Vendor.
- In case BHEL increase the quantity during currency of the contract in line with quantity variation clause of GeM bid, delivery extension on pro-rata basis shall be given for supply of these additional quantity.

Following documents are an integral part of this Tender Enquiry and endorsed copies of these documents (duly signed and stamped on each page, as a token of acceptance) are to be submitted/uploaded along with offer on GeM portal against this bid.

- Please submit replica of Price schedule (without prices) showing "quoted" in place of price along with techno-commercial bid (Part-I).
- Please submit signed & Stamped copy (each page) of duly filled of confirmation column of "Buyers Specific Additional Terms & Conditions (ATC)" and its clause wise supporting documents where required.
- Please submit signed & stamped copy (each page) for qualifying PQR with proper filled information and related supporting documents as mentioned in PQR.
- Please submit certificate of Minimum local content as specified in the Make In India Certificate of the tender

DECLARATION REGARDING MINIMUM LOCAL CONTENT IN LINE WITH  
REVISED PUBLIC PROCUREMENT (PREFERENCE TO MAKE IN INDIA), ORDER 2017- REVISION

Thanking you,  
Yours faithfully,

(Signature, Date & Seal of Authorized Signatory of the Bidder)

\*\* - Strike out whichever is not applicable.

Note:

1. Bidders to note that above format, duly filled & signed by authorized signatory, shall be submitted along with the techno-commercial offer.
2. In case the bidder's quoted value is in excess of Rs. 10 crores, the authorized signatory for this declaration shall necessarily be the statutory auditor or cost auditor of the company (in the case of companies) or a practicing cost accountant or practicing chartered accountant (in respect of suppliers other than companies).
3. In the event of false declaration, actions as per the above order and as per BHEL Guidelines shall be initiated against the bidder.

**General Instructions and Standard Terms & Conditions for bidding against Tender Enquiry (GISTC)**

**For Indian Bidders (Version Jun-2025, Rev: 08)**

### **Annexure-3**

#### **Declaration for treatment of cases regarding conflict of interest**

The bidder notes that a conflict of interest would said to have occurred in the tender process and execution of the resultant contract, in case of any of the following situations:

- a) If its personnel have a close personal, financial, or business relationship with any personnel of BHEL who are directly or indirectly related to the procurement or execution process of the contract, which can affect the decision of BHEL directly or indirectly;
- b) The bidder (or his allied firm) provided services for the need assessment/ procurement planning of the Tender process in which it is participating;
- c) Procurement of goods directly from the manufacturers/suppliers shall be preferred. However, if the OEM/Principal insists on engaging the services of an agent, such agent shall not be allowed to represent more than one manufacturer/ supplier in the same tender. Moreover, either the agent could bid on behalf of the manufacturer/ supplier or the manufacturer/ supplier could bid directly but not both. In case bids are received from both the manufacturer/ supplier and the agent, bid received from the agent shall be ignored. However, this shall not debar more than one Authorized distributor (with/ or without the OEM) from quoting equipment manufactured by an Original Equipment Manufacturer (OEM) in procurements under a Proprietary Article Certificate.
- d) A bidder participates in more than one bid in this tender process. Participation in any capacity by a Bidder (including the participation of a Bidder as a partner/ JV member or sub-contractor in another bid or vice-versa) in more than one bid shall result in the disqualification of all bids in which he is a party. However, this does not limit the participation of an entity as a sub-contractor in more than one bid if he is not bidding independently in his own name or as a member of a JV.

The Bidder declares that they have read and understood the above aspects, and the bidder confirms that such conflict of interest does not exist and undertakes that they will not enter into any illegal or undisclosed agreement or understanding, whether formal or informal with other Bidder(s), in this regard. This applies in particular to prices, specifications, certifications, subsidiary contracts, submission or non-submission of bids or any other actions to restrict competitiveness or to introduce cartelization in the bidding process.

**In case, the Bidder is found having indulged in above activities, the same will be considered as a violation of the tender conditions, and suitable action shall be taken by BHEL as per extant policies/ guidelines.**

Pre-Qualification Requirements (PQR) for Grounding Brush monitor (GBM) System  
Material code no. W90418110018 & W90418110026

Purpose of System: GBM system is used in Turbo Generator for continuous monitoring of shaft voltage, insulation of bearing w.r.t ground and continuity resistance for ascertaining proper brush contact with generator shaft. The rating of Generator can be 250MW to 800MW.

- 1) Bidder shall be manufacturer or authorized supplier of Grounding brush monitor. Letter of authorization or suitable documents shall be submitted for the same.
- 2) The Vendor should have supplied above system for at least two H<sub>2</sub> cooled Turbo-Generators and system must be working for one years to the satisfaction of end customer.

In support of above, Vendor to provide customer satisfaction letter from minimum one customer or "Installation and commissioning" report (endorsed by end customer) from at least two installations should be provided by Vendor. The report shall not be older than last 7 years from date of enquiry.

OR

Successful execution of at least one order for BHEL Haridwar for Grounding brush monitor. *under last 7 years from Dec. 2017*

- 3) Grounding brush monitor should meet following requirements:
  - a) GBM system comprises A flush mounted Electronic unit for placement in control room AND field mounted Detector Unit. Cable length between Generator and Electronic unit shall be approx 100mtr
  - b) Following Inputs are envisaged: -
    - a) Voltage input from voltage monitoring brushes.
    - b) Insulation resistance measuring input from bearing.
  - c) Outputs envisaged
    - a) Shaft voltage AC rms/ DC (0-50V)
    - b) Insulation impedance VAC rms in Mohms
    - c) Continuity resistance VDC in Mohms

There shall be provision for indications and limit value setting for alarms.

Vendor to confirm compliance to 4 a), b) and c).

Notes: -

- 1) Vendor to furnish their complete reference / experience list for our review.
- 2) BHEL reserves the right to verify information submitted by vendor. In case the information is found false/ incorrect, the offer shall be rejected.

सामग्री सूची संख्या को अधिकृतित करना है	<p><b>1.0 APPLICATION :</b></p> <p>The Grounding Brush Monitoring (GBM) system is used for continuous monitoring of shaft voltage, insulation of bearing w.r.t ground and continuity resistance for ascertaining proper brush contact with the generator shaft. Schematic diagram of a typical machine is as per fig-1. The offered system shall be preferably be microprocessor based.</p>																																												
COPYRIGHT AND CONFIDENTIAL The information on this documents is the property of Bharat Heavy Electrical Limited. It must not be used directly or indirectly in any way detrimental to the interest of the company	<p><b>2.0 PRINCIPLE OF OPERATION :</b></p> <p>During operation of TG sets shaft voltages are induced due to various reasons. If a closed path can be established through any of the bearings, there will be a flow of current or the sparking which may cause damage to the bearing surface/ liner. To avoid this situation, the generator pedestal is insulated. However, this insulation is liable to get damaged due to vibrations or external contamination.</p> <p>Static charges are developed in low pressure stage of the steam turbine due to impinging of wet steam on turbine blade at high speeds. The DC voltage generated due to these static charges could be of the order of 50 volts or more and it shall try to discharge through the thin oil film, damaging the bearing. Hence it becomes essential to ground the shaft through brushes. Since the brush contact also deteriorates over a period of time, it becomes necessary to continuously monitor the good contact of brushes as well as healthiness of bearing insulation. Two number current brushes installed in X-Y planes are connected in parallel to ensure connectivity of earthing brushes.</p> <p>Figure no. 1 indicates position of brushes and measurement derived from the same, alongwith schematic diagram of voltage and current monitoring circuits. A low impedance shunt resistor of 0.1 Ohms value is connected in the ground path. The current flowing through the circuit is calculated by measuring the voltage drop across this shunt. If the RMS value of the current exceeds the preset limits, it energizes alarm circuit.</p> <p>Shaft voltage is continuously monitored with the help of independent brush as it is important to keep a watch on earthing brushes proper contacts with the shaft. To achieve this, the shaft voltages (both positive and negative peaks) are compared with the set values. The alarm values are adjustable and can be set as per standard guidelines or history of the machine.</p>

Alternatively, the bidder will perform these tests on at least one instrument in accordance with IEC 60068/ IS9000 (relevant parts) either at supplier's works or at an approved test house, at supplier's cost. These tests shall be as listed below : i) Dry heat test. ii) Damp test. iii) Surge with stand test as per ANSI 37.90 a iv) Free fall test (bump test)  <b>8.2 ROUTINE TESTS :</b> Routine tests shall be conducted at supplier's works free of cost. Following minimum (but not limited to) tests shall be conducted;  a) <b>IR TEST</b> : Insulation resistance shall be at least 20 Mega Ohms between measuring terminals and ground when measured by a 500 V megger. b) <b>HV TEST</b> : HV test shall be conducted at 2 KV (rms) for one second without failure (excluding electronics). c) <b>Repeat IR TEST</b> to be done after HV Test d) <b>SIMULATION TEST</b> : Each instrument shall be tested to demonstrate output signals, LED indications and digital indications for given set values and actual values. For this purpose, actual values for each input condition shall be simulated. e) <b>BURN-IN TEST</b> :- At elevated temp of 55 degree Cel for 48 hours in energised condition at mutually agreed test cycle. The test will follow the simulation test again to demonstrate satisfactory performance after this test.				
	<b>9.0 ACCEPTANCE NORMS</b> : Meeting requirements of clause 8.0  <b>10.0 TEST AND GUARANTEE CERTIFICATES :</b>  Three copies of tests certificates for routine & type tests and guarantee certificates shall be furnished along with the equipment.

## **BHARAT HEAVY ELECTRICALS LIMITED**

HEEP-HARIDWAR, UTTARAKHAND (249403)

**General Instructions and Standard Terms & Conditions for bidding against Tender Enquiry (GISTC)**

**For Indian Bidders (Version Jun-2025, Rev: 08)**

### **Annexure-3**

#### **Declaration for treatment of cases regarding conflict of interest**

The bidder notes that a conflict of interest would said to have occurred in the tender process and execution of the resultant contract, in case of any of the following situations:

- a) If its personnel have a close personal, financial, or business relationship with any personnel of BHEL who are directly or indirectly related to the procurement or execution process of the contract, which can affect the decision of BHEL directly or indirectly;
- b) The bidder (or his allied firm) provided services for the need assessment/ procurement planning of the Tender process in which it is participating;
- c) Procurement of goods directly from the manufacturers/suppliers shall be preferred. However, if the OEM/Principal insists on engaging the services of an agent, such agent shall not be allowed to represent more than one manufacturer/ supplier in the same tender. Moreover, either the agent could bid on behalf of the manufacturer/ supplier or the manufacturer/ supplier could bid directly but not both. In case bids are received from both the manufacturer/ supplier and the agent, bid received from the agent shall be ignored. However, this shall not debar more than one Authorized distributor (with/ or without the OEM) from quoting equipment manufactured by an Original Equipment Manufacturer (OEM) in procurements under a Proprietary Article Certificate.
- d) A bidder participates in more than one bid in this tender process. Participation in any capacity by a Bidder (including the participation of a Bidder as a partner/ JV member or sub-contractor in another bid or vice-versa) in more than one bid shall result in the disqualification of all bids in which he is a party. However, this does not limit the participation of an entity as a sub-contractor in more than one bid if he is not bidding independently in his own name or as a member of a JV.

The Bidder declares that they have read and understood the above aspects, and the bidder confirms that such conflict of interest does not exist and undertakes that they will not enter into any illegal or undisclosed agreement or understanding, whether formal or informal with other Bidder(s), in this regard. This applies in particular to prices, specifications, certifications, subsidiary contracts, submission or non-submission of bids or any other actions to restrict competitiveness or to introduce cartelization in the bidding process.

**In case, the Bidder is found having indulged in above activities, the same will be considered as a violation of the tender conditions, and suitable action shall be taken by BHEL as per extant policies/ guidelines.**
