	CORPORATE PURCHASING SPECIFICATION	AA 281 28
		Rev. No. 06
		PAGE 7 OF 10

10.3 Measuring Method:

Overall thickness shall be measured at three positions not less than 100 mm apart. The measurements shall be made on completely straight parts of the conductor. The measurement shall include at least one overlap. The average of the three results shall be reported as the overall thickness. The covering shall be removed by any method which does not damage the conductor for three positions used for the measurement of the conductor for three positions used for the measurement of overall thickness and conductor thickness measured at these positions. The average of the three results shall be reported as conductor thickness.

The difference between the overall thickness and the conductor thickness shall be reported as the increase in dimensions due to covering.

10.4 Counter check :

The increase in dimensions due to covering shall also be counter checked by adding up the thickness of paper used in each layer. Radial build up due to the outermost 25 percent overlap wound layer shall be taken as 1.5 times the thickness of paper used. The thickness of paper shall be measured by ratchet micrometer by stacking the tapes of paper in different layer one above the other. However, the thickness of overlap layer shall be separately measured. Paper tape shall not be folded to form two or more tapes. Length of paper tapes shall not be less than 150 mm. Five measurements shall be made distributed over the stack. The paper thickness shall be computed by dividing by five the mean of the five readings.

10.5 Radial insulation so computed in CI 10.4 shall not be less than the minimum allowed (considering the appropriate tolerance) as per CI 10.1.

10.6 Maximum overall Dimension:

Overall dimension shall not exceed the sum of the maximum bare dimension and the maximum increase in dimension due to covering permitted.

11.0 SPECIFIC REQUIREMENTS FOR BUNCHED WIRE:

11.1 To facilitate proper bunching without any tearing of the paper, paraffin wax on mating surfaces of two or more strips (each covered with individual paper insulation) shall be applied by the manufacture. Total thickness of wax coating shall not exceed 0.02 mm. Extra built up to this extent, i.e. 0.02 mm over specified covered dimensions shall be allowed.

11.2 Insulation Test :

The insulation test at 250 V, AC for 1 minute shall be conducted on all drums, between conductors. A fuse wire of 1 ampere rating shall be connected in series with test specimen. The drum shall be considered to have passed the insulation test if charging current is less than 1 ampere i.e. fuse wire is not fused. An ammeter shall also be connected in the circuit to measure leakage current between adjacent strands of bunched wire.

The test setup shall be as given below :

23	Benefits earmarked to suppliers for Purchase under 'MAKE IN INDIA'
	As part of minimizing import content, Government of India, vide order no P-45021/2/2017-B.E.-II dated 15.06.2017, under the subject – Public Procurement (Preference to Make in India) -- has set the initiatives to encourage and promote indigenously manufactured goods within India and services provided by sources within India. In line with this, bidders who manufacture the goods and provide services within India (otherwise referred as local suppliers) are given purchase preference and are entitled to benefits in the tender
A	Definitions
(i)	Local content means the amount of value added in India which shall, unless otherwise prescribed by the Nodal Ministry, be the total value of item procured (excluding net domestic indirect taxes) minus the value of imported content in the item (including all customs duties) as a proportion of the total value, in percent. Presently, the minimum local content required is 50%. The nodal ministry may prescribe a higher or lower percentage in respect of any particular item and may also prescribe the manner of calculation of local content.
(ii)	Local supplier means a supplier or service provider whose product or service offered for procurement meets the minimum local content as prescribed
(iii)	Margin of Purchase Preference means the maximum extent to which the price quoted by a local supplier may be above the L1 for the purpose of purchase preference. Presently the margin of Purchase preference is 20%.
B	Conditions under which preference is given
(i)	In procurement of goods in respect of which the Nodal ministry has communicated that there is sufficient local capacity and local competition, and where the estimated value of procurement is Rs 50 lakhs or less, only local suppliers shall be eligible. If the estimated value of procurement of such goods is more than Rs 50 lakhs, provisions of 23(B) (ii) and 23(B)(iii) shall apply.
(ii)	If the procurement of goods are not covered by 23(B)(i) and are divisible in nature, the following procedure shall be followed :
a	If L1 is a local supplier, the order for full quantity shall be awarded to local supplier
b	If L1 bid is not from a local supplier, 50% of the order quantity shall be awarded to L1. Thereafter, the lowest bidder among the local suppliers, shall be invited to match the L1 price for the remaining 50% quantity, subject to the local supplier's quoted price falling within the margin of purchase preference, and the order for that quantity shall be awarded to such local supplier subject to matching the L1 price. In case such lowest eligible local supplier fails to match the L1 price or accepts less than offered quantity, the next higher local supplier within the margin of purchase preference shall be invited to match the L1 price for remaining quantity and so on, and the order shall be awarded accordingly. In case some quantity is still left uncovered on local suppliers, then such balance quantity may also be ordered on the L1 bidder.
iii	If the procurement of goods are not covered by 23(B)(ii) and are not divisible in nature, and in procurement of services where the bid is evaluated on the price alone, the following procedure shall be followed :
a	If L1 is a local supplier, the order shall be awarded to local supplier
b	If L1 bid is not from a local supplier, then the lowest bidder among the local suppliers, will be invited to match the L1 price, subject to the local supplier's quoted price falling within the margin of purchase preference, and the order shall be awarded to such local supplier subject to matching the L1 price. In case such lowest eligible local supplier fails to match the L1 price, the local supplier with the next higher bid within the margin of purchase preference shall be invited to match the L1 price and so on, and the order shall be awarded accordingly. In case none of the local suppliers within the margin of preference match the L1 price, then the order may be awarded to the L1 bidder.
C	Exemption of small purchases
	Notwithstanding anything contained at clause 23B above, procurements where the estimated value of procurement is less than Rs 5 lakhs are exempt and purchase preference shall not be accorded in such cases.
