

CORRIGENDUM –I

Ref Eng: NKR0000160

Clarifications regarding tender specification -

PADO server:

- Hard Drive Speed: Wherever the speed of the drives are not mentioned, the same may be taken as 10K.
- RAID: For handling RAID configuration, Hardware based RAID card may be taken having 512MB memory or more.
- Removable HDD: USB based External HDD may be taken from the set of Vendors as mentioned in the Specifications. At this point no new vendors for the same can be accepted as the specifications have been frozen by the customer.
- The Power supply: The same is frozen by the customer and any change to a lower wattage at this point is not acceptable.
- CAL license: 5 number of CAL license are required for each PADO server which are user based.
- OS: Operating system may be taken as 2008 R2 or 2012 R2

PADO Workstations/ IF PC's

- The Power supply: The same is frozen by the customer and any change to a lower wattage at this point is not acceptable.
- Number of PCI/PCIe slots: The number shall be to suffice the requirements of the additional cards mounting as mentioned in the specifications leaving one spare slot for any future requirements.
- Windows OS: Most of the vendors have accepted in supplying Windows 7 Professional, Downgraded with a windows 10 license. However if a vendor is unable to supply workstation downgrade to windows 7, He/She is required to submit letter from Microsoft and OEM, stating that downgrade from windows 10 to windows 7 is not available in any of their series of workstations and no driver support is available from Microsoft and OEM. In that event the vendor may supply windows 10 based workstations. It is however again requested to explore the possibility of supplying PC with windows 7 since our softwares have better compatibility with windows 7 proff.
- Machine: All machines are to be 64 bit only.
