Product: Liquid Oxygen

Material Code - HY5440069020

It is stored as a cryogenic liquid in a vacuum-insulated vessel which can provide several days' supply and be used on demand as either a liquid or gas.

Features

- Odourless and colourless
- Blue in liquid form
- Boiling point -183°C
- Reacts chemically with many substances
- Vigorously supports combustion
- Materials not normally considered flammable can be ignited in an oxygen rich atmosphere.

Specification

- Oxygen Purity 99.60%
- Moisture Content <2vpm
