D	TOTAL COST OF PACKAGE (A+B+C)									

In case of an extra visit, the above charges would be applicable for the visit and if there is any extra stay during the visit at site, the charges shall be @ Rs. -----/ per day

Note:

- Load carrying capacity mentioned for the variable items ("marked") is tentative only and shall be used for bid evaluation and ordering purpose.
- The actual load carrying capacity of the springs may undergo change after ordering, based on springs selected during detailed engineering.
- In such a case, price bid evaluation shall be done again based on revised load carrying capacity of the springs keeping all the prices same as quoted originally. In case of change in L1 status, the quoted price per unit load carrying capacity (kN) of the variable items (i.e. A1.1 & A1.2) of the original L1 shall be revised accordingly.
- Based on above, amendment to PO, if required, shall be issued.
- Generally the damping shall be required in the range of 5% to 20% of critical damping of whole machine foundation system to meet the design requirement. In exceptional case it may vary upto 30 % depending upon the available/selected spring unit as well as layout constraints. The bidder shall accept the same.
- Price per Visit is lumsump which includes travel and accommodation charge.
