## **PAINTING RECTIFICATION PROCEDURE**

1. The extent of damage/ peel off of the paints due to welding/rusting at the affected areas is only 10-12% and is within 25 % of the total area.
2. As discussed, if the percentage of damage / peel off area is within 25 % of the total area which comes under the ambit of localised damage, surface cleaning by mechanical tools (SSPC-3) to be carried out at the affected areas.
3. As the procedure adopted above for the rectification and replacement of the finish shade of paint with Aluminium shade has provided satisfactory finish and DFT, the rectification procedure is acceptable.
4. Similarly, same procedure will be carried out on the inside surface of the Ducts after due approval.

**The committee recommends to adopt the above rectification procedure for all such localised painting damages of the ducts and structures of the HRSG project.**
