Kind Attn. Mr. Venugopal N.V. and Mr. Reddeppa Angajala

Dear Sirs,

Subject: Suitability of Consignment Packing for SEA Freight

Following to your request to know if the packing is suitable for SEA Freight, API Capacitors Limited is pleased to inform you that standard packing is suitable for either AIR or SEA Freight. The capacitors are designed to operate in high humidity levels at an 95%. **However, please note that black plastic wrapped packing crates must not be stacked. To clarify, nothing can be placed on top of these crates.**

Please see the below summarising the items that are currently awaiting collection by your nominated freight forwarders;

Further, we wish to highlight as below;

- 1) Please advise how the goods will be collected. API assumes a lorry will collect items from factory, and the loading in dedicated container(s) will take place at haulage yard of freight forwarder. API does not have loading space on site to load a container.
- 2) The present payment terms are 45 days Sight draft form Invoice date on Ex-Works basis, now due to SEA freight, we trust there would not be any change in payment time lines. Please confirm.

Should you have any further questions, please do not hesitate to contact me.

Kindly Regards,

Laurence Mitchell
